

❖ **One Day Workshop on Structuring Your Scientific Thesis and Research Papers with LaTeX**

On 12th March, 2025, the Physics Department organized a workshop focusing on the methodologies for structuring scientific thesis and research papers, coupled with the practical application of LaTeX, a powerful word processing tool particularly adept at handling the complexities of mathematics and science. Recognizing the importance of both content organization and presentation, this workshop aimed to equip participants with the skills necessary to effectively structure their scholarly work and utilize LaTeX to produce professional and well-formatted documents.
