HEALTH CHECK UP AND HEALTH TALK BY AIMS DOCTOR

29/08/20224

A free health checkup and guest lecture were organized under the joint initiative of the Prahari Club, Red Ribbon Club, Department of Computer Science, and the Department of Community and Family Medicine at AIIMS Bilaspur. The program was conducted under the leadership of the college principal, Dr. P.S. Kutwal. In this awareness campaign, Dr. Navpreet and Dr. Prateek Goyal provided detailed information to the students on topics such as "Health implications of sexual behaviour," HIV Stigma "Substance Abuse," and "Its Determinants." Dr. Navpreet spoke that HIV stigma refers to irrational or negative attitudes, behaviours, and judgments towards people living with or at risk of HIV. It can negatively affect the health and well-being of people living with HIV by discouraging some individuals from learning their HIV status, accessing treatment, or staying in care. HIV stigma can also affect those at risk of HIV by discouraging them from seeking HIV prevention tools and testing, and from talking openly with their sex partners about safer sex options. Populations disproportionately affected by HIV are also often affected by stigma due to, among other things, their gender, sexual orientation, gender identity, race/ethnicity, drug use, or sex work.

HIV stigma drives acts of discrimination in all sectors of society, including health care, education, the workplace, the justice system, families, and communities. Breaking down HIV stigma is a critical part of ending the HIV epidemic. As part of the event, over 150 students from the college underwent checks for blood sugar, blood pressure, general physical health.

अनेक प्रयोगों में यह सिद्ध हुआ है कि मनुष्य में तब तक कि वह सोचता है कि वह अपने स्वयं के अर्थों के लिए जी रहा है, वह अपने जीवन में असंतोष और असुख का अनुभव करता है। किंतु जब वह अपने जीवन के अर्थों को समझ लेता है, तो वह अपने जीवन में सन्तुष्टि और सुख का अनुभव करता है। अतः हमें अपने जीवन के अर्थों को समझना चाहिए।
