## From Principal's Desk

*Greetings to all students, faculty, and esteemed members of our college community !*

*It is my privilege to address you through our college magazine—a platform that celebrates our collective achievements and fosters a shared sense of identity and purpose. This publication stands as a testament to the vibrant academic and cultural life that thrives within our institution, shaped by the hard work, creativity, and dedication of our entire college family. It is also a platform to encourage original thinking and creative expression.*

*As we prepare to implement NEP 2020 in our institution, we remain committed to aligning our academic practices with its visionary framework. At the same time, we recognize the importance of integrating ICT across teaching, learning, and administration. By embracing digital tools and fostering digital literacy, we aim to equip our students with the competencies required to navigate a connected world, collaborate across borders, and adapt to the evolving demands of the global economy. Through this approach, we are preparing our students not just for academic success, but for meaningful participation in a broader, technology-enabled society.*

*As one of the leading institutions in the state, our college remains steadfast in its mission to nurture intellectual curiosity, support innovation, and promote the all-round development of every student. This year, we have witnessed commendable achievements in academics, sports, the arts, and community service—each reflecting the energy and dedication of our student body. The unwavering commitment of our faculty to teaching and research continues to inspire our learners and guide them toward realizing their full potential.*

*My congratulations to Dr. Namrata Pathania, Chief Editor, her editorial team, contributors, and all who played a role in bringing this magazine to life. Your efforts are deeply appreciated. As we look ahead, let us continue to uphold the core values of integrity, inclusivity, and excellence that define our institution. Together, let us build a campus where ideas are born, leaders are shaped, and dreams take flight.*

*Wishing you all a fulfilling and successful academic year.*

*Warm regards,  
Dr. P.S. Kutwal  
Principal*

## From Chief Editor's Desk

*"The true progress of a society is measured by the progress of its students."*

*Dr. Sarvepalli Radha Krishnan*

*Dear Readers,*

*It is with great pride and a profound sense of responsibility that I present to you the latest edition of our college magazine, 'Vyas'. Every article, story, poem, and essay you will read is a reflection of the vibrant spirit of innovation, creativity, and intellectual pursuit that defines our college community. The mission of Vyas is not just to inform or entertain, but to inspire, provoke thought, and connect. Within these pages, you will discover works that delve into contemporary issues, celebrate creativity, and share unique perspectives that echo the diversity and dynamism of our student body. Each contribution tells a story of ambition, courage, and dreams that speak to the heart of who we are as individuals and as a community.*

*Creating this edition has been a labour of love and collaboration. I would like to express my deepest gratitude to the Editorial Board for their unwavering commitment and effort in creating and refining the numerous submissions. Their editorial wisdom and hard work have been the driving force behind bringing this magazine to fruition.*

*I would also like to extend my sincerest thanks to every contributor—your passion and dedication have made this publication possible. I am also deeply grateful to our respected Principal, whose constant encouragement and trust in me as Chief Editor have been invaluable.*

*As you explore this edition, I hope it not only entertains you but also inspires you to look deeper within and push further toward your goals. Let this magazine be a reminder that the journey of self-discovery and progress is ever on-going.*

*Happy Reading!*

*Warm regards,  
Dr. Namrata Pathania  
Chief Editor*

HAS (alumnus of Govt. College Bilaspur)  
by college administration on his remarkable achievement

Principal, Dr. P.S. Kutwal along with Hon'ble  
Chief Minister Himachal Pradesh, Sh. Sukhvinder Singh 'Sukhu' ji,  
during inauguration of First Digital Library of the State at District Library Bilaspur

## *English Section*

*Staff Editor*  
*Prop. Anu Priya*

*Student Editor*  
*Mr Nitin Kumar*

## **Student Editorial**

*It is an immense honor to be chosen as the student editor for the English section, and I extend my heartfelt gratitude to my teachers and mentors from Department of English for believing in my abilities. This role is not just a position but a responsibility to uphold the standards of creativity, expression, and critical thinking.*

*English as a language is not just about grammar and vocabulary; it is a medium that connects thoughts, emotions, and cultures. I take this opportunity to bring fresh ideas, engage with aspiring writers, and foster a space where talent finds its true worth. I am very thankful to my peers for their contributions and teachers for their guidance. Once again, my sincere thanks to the Chief Editor for this trust, and I hope to make this experience enriching for everyone.*

*Wishing you all a happy reading.*

*Nitin Kumar*

*BA III Year - Student Editor*

## **The Surprise of life**

*Where there's love there's a lie*

*Later or sooner you will listen a goodbye*

*There will be no why after that separation*

*We don't know what will end our cherished relation*

*The real destiny is to have better preparation for  
that only and final destination*

*During life there will be so many variation*

*Don't trust on this creation just wait for your turn*

*It's yours life. It's yours respect that you have to earn*

*For a better tomorrow you have to burn your blood  
without any concern.*

*Manisha Sharma*

*Roll No. - 22ENG029C*

## **Life's A Beautiful Broach**

*Teary eyes and face with a frown, I was sitting alone at the beach.*

*Looking at the sand light brown, Thinking about my life and breach.*

*Looking at a boy running around, Playing with his dog I found.*

*Sitting beside me he said. Your face so sad what made ?*

*Stupid situations of my life, Feels like killing them with a knife.*

*He said took around for a while. There is so much for you to smile.*

*Look at the colorful balloon. They teach us something true.*

*They say not everyday is a bright boon. Grey days will one day turn for sure.*

*Waves tell you to never stop. Life is like a beautiful broach*

*One day you will reach the top, Just wear it with a positive approach.*

*Ayush Dhillon*

*Roll No. - 23ENG016*

## **Do not lose hope**

*Life is too short to dwell on your mistakes and crib over them. Instead, you must embrace life's lessons, learn from your experiences and strive toward making the world beautiful and sophisticated. Both good and bad times are temporary, and just as you celebrate good times, you should face life's challenges with patience and a consistent smile, knowing that "this too shall pass". Failures, more than successes, provide valuable lessons. While you desire glory and glamour, it is failures that teach you allowing you to maintain equilibrium in life. You are bound to face obstacles and that's the beauty of life. You should focus on what's in your control, maintaining positive energy through practices like yoga and keeping a calm mind. Analyzing your mistakes and strategizing for improvement is essential. Passing on your rich experiences to future generations can create a better world.*

*Sameer Vatsyayan  
BA 2nd Year*

## **The nostalgia of College Life !**

*The most favorite chapter of life makes you feel like reading it, makes you feel like going back to college life once again, some things which seem like yesterday. So many memories are there to be revisited, the longing to turn back in time and relive those carefree days is overwhelming. You remember the laughter, the jokes, and the light hearted conversations with friends who became like family.*

*But life has a way of moving forward, and people drift apart. The loss of friends hurts deeply, leaving a void in your heart that can't be filled. You yearn to go back to those college days, to attend classes once again, to sit in the lecture hall and listen to your professors, to participate in discussions and debates. You miss the little things, too closing your eyes during lunch, feeling the warmth of the sun on your face, and listening to the chatter of your friends. Those were the days of discovery, of growth, of forming bonds that would last a lifetime.*

*As you sit reminiscing about the past, you can't help but feel a pang of sadness. Life has moved on, and things can never be the same again. Memories have come back, that wonderful joke of exam time has come to mind. some friends used to eat dinner on exam nights, some used to make future plans by having love chats on the phone, and then in the morning they say, "Yaar thoda gap jyada mila to jyada padh lete"*

*Ankit Kumar  
BA II, 12 ENG 030*

## ***The Power of Positive Thinking***

*Many people tend to evaluate events that do not correspond to their plans and the usual picture of the world as an obstacle that prevents achieving the goal. In turn, people who practice positive thinking in such situations see the problem as an opportunity on the road to success, not an obstacle. Thus, positive thinking is the ability to evaluate life not from the point of view of problems, but from the position of a series of successful coincidences that inevitably lead to improvements. Positive thinking is more than just an optimistic outlook; it's a mind set that enables individuals to reframe their perspective on life. Instead of viewing unexpected events as roadblocks to success, positive thinkers see them as opportunities for growth, learning, and improvement. This mind set allows them to approach challenges with resilience, adaptability, and creativity.*

*A person involuntarily falls into a whirlpool of negative emotions and thoughts in the modern world, filled with disturbing information, high turbulence with economic crises, natural disasters, and pandemics. However, it's precisely during these challenging times that positive thinking becomes an indispensable tool for navigating life's obstacles. Therefore, nowadays, in the face of alarming changes in all the spheres, positive thinking is essential since this will allow one to be less irritated and constantly radiate inner harmony and success.*

*Vinay BA II*

## ***Reel or Real ?***

*Reel and Real sound the same but have very different meanings. It is the thin line between fiction and reality. From starting days of cinema to digital age of mobile phones or social media, it's always been a powerful way for shaping people's beliefs, emotions and perceptions. Reel life fictional characters leave a deep impact on people's life. The impact of reel life on our perceptions and emotions cannot be overstated. We become invested in fictional characters and storylines, often to the point where we start to internalize them as our own experiences. We construct illusions, and before we know it, our grasp on reality begins to slip. The constant stream of unrealistic portrayals on social media and television can lead to feelings of dissatisfaction, anxiety, and even depression.*

*But the question is that is it only in digital sphere? We are in the era where people hide their pain behind smiles, their eyes expression do not match their words still we are doing it. What is real? We all are living in delusions. We're all guilty of presenting a curated version of ourselves to the world, while secretly struggling with our own demons. The question remains: can we distinguish between what's real and what's reel?*

Or have we become so entrenched in our delusions that we've lost sight of what's truly important ? In a world full of filters, bright and bold, where stories are bought and dreams are sold. A perfect smile, a flawless face, is it Fiction or Reality, Reel or Real ? The answer, much like the line between fiction and reality, remains tantalizingly out of reach.

Anchal

### **Tired of my Life....!**

*In the classroom, day by day, I chase my dreams, I find my way. But sometimes, oh ! I'm tired of life, Amidst the stress and endless strife.*

*Homework piles high, exams loom near, I yearn for a moment, a pause, a tear, In this whirlwind of books and strife. I wonder, am I tired of life ?*

*But then I glimpse a glimmering light, A friend's warm smile, a starry night. And in these moment. I find my way, Renewed, refreshed for another day.*

*Life's a journey, full of bends, And though it's tough, it all depends.*

*On how I see the world so wide, I'll find the strength is enjoy the ride.*

*So when I'm weary, feeling the strife, I'll remember the joys, the wonders of life.*

*For Though it's tough, with struggles rife. I'll never truly be tired of life.*

### **What is ailing our tourism ?**

*India is known for its rich flora and fauna, beautiful landscape, glorious past and varied cultural trends. All this makes India a major attraction for tourism. However, the reality is far from this. Tourism in India has been constantly suffering setback due to it's inefficient tourism industry. Bad and filthy roads, rickety buses, over priced taxis, delayed trains, all make travailing a nightmare in India. Moreover, the absence of decent and hygienic accommodation at a reasonable cost, adds to the distraction of tourists visiting India. Besides, the growing menace of terrorism is a huge deterrent for tourists. The government of India needs to put concerted efforts in place to revamp tourism in the country. Utmost emphasis should be placed on infrastructure development and beefing up the security. Such effort will certainly make India leader in the world of tourism.*

Akanksha Thakur

## **Role of ChatGPT in Students Life**

*In today's fast-paced academic world, ChatGPT has become an invaluable tool for students, revolutionizing the way they approach their studies. With its ability to provide instant explanations, offer guidance on complex topics, and generate ideas, ChatGPT serves as a virtual tutor, helping students grasp difficult concepts with ease. Whether it's assisting with research, answering subject-specific queries, or offering detailed examples, ChatGPT can enhance understanding and support academic growth. It not only facilitates learning by breaking down intricate ideas but also encourages independent thinking by providing students with resources and perspectives they might not have considered. Additionally, it aids in writing assignments, improving grammar, and even generating creative content. The accessibility and convenience of having a knowledgeable assistant available 24/7 empower students to study more effectively and efficiently, ensuring that learning remains continuous and not confined to traditional classroom hours. As a result, ChatGPT plays a pivotal role in shaping modern academic success, equipping students with the tools they need to excel in their studies.*

### **Story of Shri Bhandari Ram**

**Shri Bhandari Ram, VC (24 July 1919-19 May 2002)**

*Shri Bhandari Ram, born into a Brahmin family in the village of Serwa (Gehrwin) in Bilaspur district, Himachal Pradesh, stands as an emblem of extraordinary valor and dedication. Serving as a Sepoy in the 16th Battalion of the 10th Baluch Regiment during World War II, he displayed unparalleled bravery against the Japanese forces in the Burmese Campaign, earning him the Victoria Cross, the highest military honor awarded for gallantry in the face of the enemy in British and Commonwealth forces.*

#### **The Act of Heroism**

*On 22 November 1944, during the Third Arakan Offensive in East Mayu, Arakan, his platoon was tasked with capturing a Japanese stronghold perched atop a steep ridge. Under intense machine-gun fire, Bhandari Ram sustained severe injuries to his shoulder, leg, face, and chest but remained undeterred. Crawling through enemy fire with superhuman determination, he advanced to within five yards of the bunker and hurled a grenade, killing the enemy gunner and two others. Inspired by his courage, his platoon captured the position. Only after the objective was secured did he permit his wounds to be treated. His selflessness and courage were pivotal to the platoon's success, a feat for which he was awarded the Victoria Cross.*

## **Recognition and Awards**

*On 3 March 1945, Bhandari Ram was decorated with the Victoria Cross by the Viceroy of India, Field Marshal Lord Wavell, at the Red Fort, Delhi. Over his career, he received numerous other honors, including :*

**World War II Medals :** 1939-45 Star, Burma Star, and War Medal 1939-1945.

**Post-Independence Medals :** General Service Medal, Samar Seva Star, Raksha Medal, and Indian Independence Medal.

**Service Medals :** Long Service Medals (9 and 20 years).

**Commemorative Medals:** Queen Elizabeth II Coronation, Silver Jubilee, and Golden Jubilee Medals.

## **Life After the War**

*Bhandari Ram continued his military service in the Indian Army post-independence.*

*Rising through the ranks. he was promoted to Subedar in 1958, Subedar Major in 1967, and retired with the honorary rank of Captain in 1969.*

## **Legacy**

*Bhandari Ram passed away on 19 May 2002 in his hometown of Auhar. Himachal Pradesh. His extraordinary courage and sacrifice remain an enduring legacy, inspiring generations to uphold the values of duty and selflessness.*

## **Ode to Divine Grace**

*0, for thou who art most exalted, i beseech thee,*

*Stay thou my descent and bid me not to soar,*

*Only direct me to the path that leadeth me to thee.*

*And every trial that doth cross my path.*

*I shall uphold, as thy stoutest champion,*

*Though it may tremble my world,*

*I shall not be found murmuring to any,*

*not even thee.*

*Validate me or not, O my lord divine,*

*Yet shield me from the praise of devils malign.*

*Though the path to thee be strewn with thorns,*

*Grant me courage to tread upon it,*

*Yet let me not be tempted by the rose petals,*

*That beckon me to the other side.*

*0, for thou who art most exalted i beseech thee.*

*Bhargavi*

*Roll No. - 24ENG023*

## **House Maker**

*I am a man  
I can't cry  
my tearless self is  
A strength of mine  
Emotions, I don't feel it  
inside me it's all dark  
screams, pain can't show it  
I might fall apart  
you are a man, means manly  
rough and tough  
tears and toys are for girls  
Not your kind of stuff  
You are a boy  
don't be too much girly  
trying to be a dancer  
that's not your cup of tea  
You want him to be understanding  
But won't let him understand himself.  
He suffocates with his inner crisis  
It's you who made him emotionless  
I am a woman  
I can't dream too much  
limitations, boundaries  
whole world will judge  
Job, future and career  
I better be a good mother  
after all I am a housewife  
I have family to look after  
Learn to do some house chores  
shouldn't be reading those books  
the thing you should be caring about is  
your character, clothes and looks  
Weightlifting just leave it  
that's not a piece of cake  
you are a girl be thoughtful  
it's for your own sake*

*She is the one who creates us  
You're seriously doubting her ability  
why can't she choose her own path  
after all she isn't your property  
it's twenty-first century  
don't be modern by clothes be  
a little smarter  
and have modern thoughts  
Now that you have read enough  
let me check your thoughts  
if housewife is a norm  
does House husband still sound odd  
Why do you still need some time  
to think of this and that  
woman can be a house maker  
So why can't be a man ?*

*Anuradha*

*Roll No. 24MENG010*

## **No Matter what is going on**

### **Be Thankful**

*When you feel like what you are  
experience is not enough instead  
of allowing yourself to get frustrated,  
anxious, discouraged, in disappointed  
choose to channel in a spirit of thankfulness  
Find something to be thankful for and  
begin to express gratitude because no  
matter what is going on in your world there  
is plenty to be grateful for. You have blood  
pumping through your veins.  
You have air flowing through your lungs.  
You have a roof over your head and food on  
your table.  
You have creativity that cannot be taken away  
and you have an undeniable purpose.*

*Sudesh Chandel*

*Roll.No 23MENG001*

## **World Within Myself**

*Whenever I sit in silence my thoughts stir up a storm within me I realise it every time the more I think the deeper I sink. But because I'm a lover of words and admirer of writing. My thoughts try to escape from my mind just to meet paper and ink.*

*Even when there is a hustle and bustle of people all around. My mind wanders around from tiny leaf to vast sky I know this body stays still for now I am bound But my soul and mind as birds, always fly so high.*

*This heart wants to know then tell the soil, air and the sky All I need is enough time to submerge within nature itself. One day it will happen but till then I'll be happy thinking That I know I have a world of mine within myself.*

Anuradha

Roll No. - 24MENG010

## **Velvet Noose**

*It doth pain my heart to witness youth ensnared by drugs  
For there is so much to embrace in life, yet they fall for these fatal thugs.  
Teenagers, once full of promise, now find themselves in chains  
Not only do they ruin their lives, their families bear the strain.  
Once the grip of addiction takes the hold  
escape is nigh impossible  
Like insects caught in venus fly trap  
it devours them, so despicable  
Let us strive for maturity and discern what this poison doth bring  
For it ravages our generation, a most sorrowful thing.  
We were meant to progress, to rise and soar  
Yet here we remain stuck in this cycle with no open door  
This vicious plight seems endless, a dark cloud over our fate,  
We must awaken and act, before it's too late.*

Bhargavi

Roll No. - 24ENG023

## Min Stan

*I have never beheld the face of God above Yet fair this day, I find his sweetest gift of love the girl I met in second grade now shines as none can do In every little fancy dress, she brings joy anew. Sometimes she teaches me the lesson of heart. A preacher of sweet wisdom playing her noble part. A clown to lift my spirit high, she banished my woes. And when the bully comes to play, she just keeps me on my toes. If fate should claim my breath this day, I'd hold my head up high. For i have earned the rarest treasure far beyond the sky with or without me, she shall be, a love that knows no end. Beyond the realms of life and death, my dearest, truest friend.*

Bhargavi

Roll No. - 24ENG023

## Favorite Stranger

*To my dear friend, who hath transformed into my cherished stranger, They say the purest bond of friendship blooms when naught we can offer, I hold thee in gratitude for befriending that lonely girl, Who once wandered alone in shadows of her world. We were just children when our paths first did entwine, And I must be honest, thy full name doth escape my mind, 'Tis a pity indeed, yet thy first name remains clear, For it lives on in our hearts, cherished and dear. I spoke of thy name for my brother's lovely daughter one day, And they all fell in love with it, as if by fate's play, Though ages have passed since last we did meet, Yet thy name lingers upon our tongue, like a melody sweet.*

*Forever, thou art a part of my heart, To my dear friend, who became my favorite stranger, One I can never forget. admits this earthly strife, Yet, I pray thee, bestow upon men a spark of humanity. That in their hearts may dwell, Compassion, kindness and clarity.*

Bhargavi

Roll No.-24ENG023

## HYMN of Humble Heart

*I am not merely a woman,  
I am a woman of kalyug  
The anklets that once graced -  
my feet in dance of joy,  
now clank in dread*

*The melodies that flowed from lips,  
sweet as morning dew Now lie in silence,  
as I witness terror round my head  
Human is the name we proudly bear,  
Yet in irony's cruel snare,  
humanity is rare.*

*I beseech thee, O God,  
in my next breath of life*

*Grant me to be a woman once more,  
admits this earthly strife  
Yet, I pray thee, bestow upon men  
a spark of humanity. That in their  
hearts may dwell Compassion,  
kindness and clarity.*

Bhargavi

Roll No.- 24ENG023

## **Nature Finds its Way**

*It is year 2025 When our mother earth is tired, tired of tolerating the evil of humans. Nature has enough to fulfill the needs of people but not the greed. And this is the time, to make them understand, to make them realize their mistakes. She doesn't have voice that she can explain her pain Yes, but she do have feelings, and feelings can't be explained it can only be felt. Alas ! who cares. Humans have lost their feelings. They don't feel the pain of others.*

*And now it's nature's turn, Turn of the mother earth to take a revenge. The move to give a damn to the so called mankind. She is moving on and on, no chance of turning back. One by one everyone is dying, and the trees, the birds, the animals, the insects, the nature, the earth is smiling. It seems like she is smiling and telling. That look at all those people who say that it is all under their control, they can rule anything. The advanced technology they have today would help them to do anything they want. But they forgot that they might rule everyone around but not the nature, not the planet.*

*“Observe the nature carefully with its big and small creatures that teaches us the great lessons of life”.*

*Nowadays due to rat race in day-to-day living, human beings are alienated from nature. It teaches us real selflessness, true renunciation and sacrifice etc. We can thus learn a great deal from nature.*

*Nature is a silent teacher, friend, philosopher and guide. It removes all are pain, agonies, despairs and grieves. With it we find ourselves in an elevated state of consciousness.*

*Thus nature shows all her wealth irrespective of who we are and what we are. It never distinguishes. She between good or bad. So, this is the duty of human beings to protect their nature, their mother Earth and do not tamper with her.*

*Manisha Kumari  
Roll No. - 24 MENG003*

## **Mental Stress**

*Have you ever thought about the weight of mind ? How burdensome it can be, surrounded by worries, for from dreams.*

*A sense of emptiness that hollows you from within. Mental stress is a demon that slowly devours life. Every moment a battle, every breath a burden. Happiness lost somewhere, only sadness that doesn't leave. Nights pass by changing sides, morning bringe the same stress, the same worry. Is there a way to escape this ?*

*Yes, there is. Recognizes yourself, Understand your emotions. Talk to someone, lighten your mind. Practice Yoga, meditation, connect with nature. Pursue your hobbies, and most importantly, love yourself. Life is precious, don't waste it. Fight mental stress and live a happy life.*

## ***When I am Among the Trees***

*When I am Among the Trees, especially the willows and the honey lowest,  
Equally the beach, the oaks and the pines, they give off such things of gladness.*

*I would say that they saw me and daily. I am so distant from the hope of  
myself in which I have goodness, and discernment and never hurry through  
the world but walk slowly, and bear often. Around me the trees stir in their  
leaves and call out, "stay awhile" The light flows from their branches.*

**Kusum Thakur**  
Roll No.- 24BCM013.

## ***Running Through life : A Journey of Growth and Resilience***

*Life is often compared to race, but it's not about speed of finishing first. Its about the  
lessons learnt along the way running. Life is a series of challenges and triumphs, requiring  
balance, determination, and a stony sense of purpose.*

*When we run, we push through discomfort, fatigues and moments of doubt. Similarly  
Life throws obstacles our way unexpected set backs, failures, and periods of uncertainty. Its  
in these moments of struggle that we discover our inner strength, Proving to ourselves that  
we are capable of more than we realize.*

*The beauty of running lies in its simplicity. One foot in front of the other, one step at a  
time. Life is no different. Success is not achieved overnight but through small consistent  
efforts that build momentum over time. With every step, we grew stronger, more resilient,  
more aware of what truly matters.*

*Running also teaches us to appreciate the journey. Sometimes we focus so much on  
the finish line that we forget to enjoy the scenery, the progress.*

Roll No.- 24HIS018

## ***A Phoenix Rising***

*Every dream They tried to steal What they couldn't kill is still alive inside your heart Light  
your life from hidden spark. It's all still there, it was not lost Burn the lies that you bought  
Rise from the ashes with life renewed Show the world your deepest truth. Find fresh  
freedom every day Let inner purpose guide your way You are you do not lack strong, you do  
not lack Live your all, and don't hold back.*

**Kajal Thakur**  
Roll No. - 24 MENG 014 (2nd Sem)

## **A Time You Stepped Outside Your Comfort Zone**

*Success in school and life doesn't come from staying in our comfort zones - it comes from challenging ourselves and trying new things. One of the biggest moments of growth in my student life came when I decided to step outside my comfort zone to become better versions of myself.*

*The challenge is to be the topper of my class, but I struggled with time management and lacked confidence in difficult subjects. I realized that just studying hard was not enough - I needed better strategies.*

*I stepped outside my comfort zone by creating strict study schedules. I also started practicing test papers from YouTube and improving my weak subjects. It was not much difficult with consistency and you can see progress.*

*This experience taught me that success requires discipline, smart work strategies. Stepping outside your comfort zone helps you achieve your goal.*

*Khushi Thakur  
Roll No. - 24 BCM039*

## **A Dawn of Wonder**

*The time passes me by,  
as here I stand, with the soft mountain wind splashing  
against my tresses,  
wondering, about the reality of it all !*

*The dreadful events past me that have profoundly scared me,  
the uncontrollable fancies I hold for the  
incomprehensible future  
and the spectrum of anxious actions that I indulge myself  
in during the present. Pounding over all this,  
a profane torment lingers in my veins.*

*My hazel eyes can hardly reflect upon the inscriptions of  
Godly splendor ; when memory has stamped on it,  
the witnesses to bare - bellies starving for a touch of affection!*

*All through sleepless nights, death-like, I lay awake,  
listening to the empty laughter of riches taunted by the  
playful screeching of penniless happiness.*

*I wonder, if the matter of impartiality have any  
Implications in the natural order of survival.*

*Ritesh Kumar  
College Roll No. - 23ENG064*

## A Visitor

Smeared prayers on all four walls,  
Still it creped its way inside,  
The prayers didn't work in forbidding his arrival,  
And there he saw her, wreathed in dust,  
Drowning in the bed, Her frail body still didn't respond,  
One step he took forward,  
His presence filled the void, the room had preserved all this time,  
Sauntered his way to her, just to get a glimpse of her pale face,  
Decrepit with age or loneliness, he wondered,  
In search of her soul with his desperate eyes,  
All there was a morose room with frayed walls  
Conscious of his own touch,  
he amassed all the courage to caress her head,  
Only to realize how lifeless the body was,  
He too drowned beside her,  
The prayers once written on those walls.  
Failed to keep her alive,  
But something in them kept her in the same place,  
The prayers whose effect was fading with the exhausted walls,  
Didn't hesitate to greet a visitor after all these years

Kushal Bhatia

## The Power of Positivity

In today's fast-paced world, staying positive is more important than ever. Positivity is not just about being happy all the time but about maintaining hope, confidence, and resilience even in difficult situations.

A positive mindset helps to Overcome challenges, build strong relationships, and improve our overall well-being. As the famous saying "Your attitude determines your attitude." People with a Positivity outlook are more likely to achieve success because they see opportunities where others see obstacles.

Simple habits like practicing gratitude, surrounding ourselves with supportive people, and focusing on solutions rather than problems can help to stay positive. When we choose optimism, we inspire those around us and create a better environment for growth and success. So, let's embrace positivity and make every moment meaningful.

## *Science Section*

*Staff Editor*  
*Dr. Amit Kumar*

*Student Editor*  
*Miss Harpreet Kaur*

Dear Readers,

Greeting !!

*“The power of a waterfall is nothing but a lot of drops working together.” Similarly, Our creative endeavor ‘Vyas’ is here to reflect diverse perspectives of our student’s thinking. As an editor of ‘Science section’, I have tried to create a platform for a diverse group of people each with his or her own ideas, views and understanding of the world around. It is a mirror of the College students thinking, a historical document of the growth of our college. It was well said by Dr. APJ Abdul Kalam that “Within the mind are all the resources required for successful living. Ideas are present in the consciousness, Which when released and given scope to grow and take shape, can lead to successful events.”*

*Every individual brings his or her own new insights into science, and this is one of the best ways by which creativity, curiosity, skill, intellect of a student can be expressed. Words cannot express my gratitude and appreciation to respected Principal for giving me chance for assigning the responsibility of Editor Science Section. I would like to thank the student Ms. Harpreet Kaur Student Editor for compiling the articles. I express my appreciation to all the contributors of the science section. These contributions have required a generous amount of time and effort. I hope that you all enjoy ‘Science section’ as much as we did in creating it.*

Thank you all !!

Dr. Amit Kumar  
Assistant Professor (Chemistry)  
Staff Editor (Science Section)

### **Student Editorial**

*I Harpreet Kaur, heartily welcome you all to the science section of 'Vyas', a platform where we explore the fascinating world of discoveries and innovations. As students, we have the privilege of living in an age where science shapes every aspect of our lives, from the technology in our hands to the solutions for global challenges. Science is not just a field of study ; it is a mind set that encourages us to question, to seek answers, and to innovate for a better future.*

*I would like to express my sincere gratitude to Teacher Editor Dr. Amit Kumar for entrusting me with the responsibility of serving as the student editor for Science section of 'Vyas'. His encouragement and mentor ship have been immense in helping me contribute to this exciting initiative. It's a privilege to be part of a platform that celebrates the power of science and sparks curiosity in all of us.*

*Together, let's continue to ask bold questions, explore new ideas. and push the boundaries of what we know. Science is an endless journey, and we are just at the beginning of it.*

*Stay curious and keep exploring, Vyas readers !*

Harpreeet Kaur

## **Science : The Answer to Every Question**

Science, the systematic pursuit of knowledge, stands as humanity's most profound tool for exploring the unknown. From understanding the intricate workings of atoms to unraveling the mysteries of the cosmos, science has persistently answered questions that once seemed beyond human reach. By bridging the gap between curiosity and comprehension, science has not only explained the natural world but has also reshaped it to improve the quality of life.

The essence of science lies in its methodology. Rooted in observation, hypothesis, experimentation, and evidence, it systematically seeks truth while remaining adaptable to new discoveries. This flexibility ensures that scientific knowledge evolves, refining theories and expanding our understanding of reality. Unlike dogma, science embraces skepticism and challenges established ideas, fostering a culture of progress. This self-correcting nature is what makes science a dynamic and enduring endeavour.

Throughout history, science has replaced superstition with reason and myth with evidence-based explanations. Ancient civilizations explained natural phenomena through folklore and divine intervention. However, scientific inquiry transformed these narratives. The heliocentric model proposed by Copernicus, Newton's laws of motion, and Einstein's theory of relativity have not only provided profound insights into the workings of the universe but have also revolutionized how humanity perceives its place in it.

Science's impact extends far beyond theoretical advancement. It has been instrumental in solving real-world challenges and improving lives. The development of vaccines has eradicated diseases like smallpox, and antibiotics have saved millions from bacterial infections. Innovations in transportation, communication, and energy—such as airplanes, smartphones, and renewable technologies—stem directly from scientific research. Space exploration, powered by scientific ingenuity, has allowed humanity to venture beyond Earth, revealing the vastness and complexity of the cosmos.

Moreover, science addresses existential questions that define human curiosity. How did the universe begin? What is the nature of consciousness? Are we alone in the universe? While definitive answers may not yet exist, the scientific method offers structured pathways to investigate these profound mysteries. This approach inspires hope that the answers lie within reach as our understanding deepens.

Science, however, is not without its limitations. It does not claim to provide immediate answers to every question, instead, it is a continuous journey of inquiry, driven by curiosity and evidence. Its adaptability and openness to change ensure that it remains relevant and effective in addressing humanity's ever-evolving questions.

Fundamentally, science is more than just a collection of facts or a tool for innovation; it is a way of thinking—a relentless pursuit of understanding. While it may not yet hold the answers to every question, its capacity to illuminate the unknown and solve the unsolvable ensures its place as humanity's greatest ally in the quest for knowledge. As long as mysteries remain, science will continue to serve as the beacon guiding us toward truth, discovery, and progress.

Harpreet Kaur

B.Sc.3rd Year-22BSM011

## ***" The Miracle of Human Existence A Journey Through Time and Evolution "***

*The miracle of human existence is a tale of survival, adaptation, and extraordinary events. Our journey began in the shadows of the mighty dinosaurs, where small, nocturnal mammals thrived. These tiny creatures, living in burrows, outlasted the catastrophic Cretaceous-Paleogene extinction that wiped out their massive reptilian predators.*

*After the extinction event, mammals found themselves in a world without large predators. This allowed them to grow and evolve, eventually giving rise to primates that took to the trees for safety. With their grasping hands, feet, and long tails, primates adapted to an arboreal lifestyle, avoiding predators and finding abundant food sources.*

*Continental shifts in East Africa led to significant changes in the environment, forcing our primate ancestors to adapt to life on the ground. Walking on two legs, they freed their hands for tool use, enhancing their ability to hunt and defend themselves. The development of language further set early humans apart, enabling precise communication and the transfer of knowledge.*

*Despite numerous challenges, including ice ages and migrations, early humans adapted swiftly, spreading across continents. The discovery of agriculture and the domestication of animals marked the dawn of civilizations, allowing humans to settle in one place and form complex societies.*

*Throughout this incredible journey, humans have demonstrated remarkable resilience and ingenuity. From surviving the age of dinosaurs to building advanced civilizations, each step in our evolution highlights the extraordinary events and adaptations that led to our existence today. If any of these events had not occurred, the chain of events leading to modern humans might have been entirely different. This story of survival and adaptation is a testament to the miracle of human existence.*

## Science and Technology's

Science and technology are important parts of lives that have made life easier, more comfortable, and more luxurious. It play vital role in every Walk of our life. Science is the foundation of our Knowledge about the world around us. Without science, we would not know what causes disease, how treat it or even how to make things work. Nowadays, science and technology have become an integral part of our daily lives. Every day we experience the power of science and technology, from the phone in pocket to the food on our table to the air we breathe. Many scientific inventions have been taken place in the present age Science and technology have had a negative effect on society. It has made people lazier because they can do everything with the click of a button. It has also made people more Impatient because they can get whatever they want instantly. Moreover, it has made people ruder because they can hide behind a computer screen and say whatever they want without having to face the person they are talking to. Despite some negative effects of science and technology, we cannot deny the fact that science and technology have also had positive effects on use society We should wisely science and technology. We should use it for the benefit of humanity and not for its destruction. We should use it to improve the quality of life and not pollute and destroy the environment. We should use it to lengthen life expectancy, not to shorten it.

Pooja

Roll No.- 22PCH017

### \*"The Chemistry of Life"\*

In every breath, a chemical dance  
Oxygen and carbon, a wondrous prance  
The air we breathe, a mix of gases fine  
A delicate balance, a chemical design.

In every cup, a chemical brew  
Coffee's rich aroma, a flyover anew  
The roasting process, a series of reactions  
grand, A chemical transformation, at our  
command.

In every soap, a chemical blend  
Surfactant and suds, a cleaning trend  
The dirt and grime, a chemical foe  
The soap's chemical might, makes them go

In every pill, a chemical cure  
A synthesized remedy, a chemical allure  
The medicine's effectiveness, a chemical  
design, A chemical structure, that makes  
it shine.

Chemistry's the key, to our daily strife  
A chemical world, that's our life.

Mohd Ilyash  
B. Sc 3rd Year - 22PCH021

## ***The future of Quantum Computing: A Glimpse into Tomorrow's Technology***

*Quantum computing holds the potential to revolutionize industries and solve problems that classical, Computers cannot. By leveraging the principles of quantum computing, quantum computers use Qubits - which exist in multiple states simultaneously-allowing them to process vast amount of data faster than traditional machines. In the coming years, we can expect quantum computing to reshape fields such as cryptography, where it could break Current encryption system but also create new more secure methods. Drug discovery and material science will benefit from quantum's ability to simulate molecular interactions at unprecedeted levels, speeding up the developments of new medications and materials. Furthermore, quantum computing promises to tackle complex optimization problem in logistics, finance and article intelligence, making decision-making more effient and intelligent. The future of quantum computing is full of promises, potentially transforming the way approach problems and accelerate progress. across a wide range of disciplines.*

*Nisha Chaudhary  
B.Sc III Year- 22 PHY021*

## ***Sustainable Agriculture: Farming for the Future***

### ***Introduction.***

*Sustainable agriculture balances food production with environmental conservation. It focuses on preserving soil health, reducing pollution, and promoting biodiversity.*

### ***Key Practices***

*Soil Conservation : Crop rotation, organic fertilizers.*

*Water Efficiency : Rainwater harvesting, smart irrigation.*

*Natural Pest Control : Reducing chemical pesticide use.*

*Biodiversity : Growing diverse crops for ecosystem health.*

*Renewable Energy : Using solar and wind power in farming.*

### ***Benefits***

*Protects the environment.*

*Produces healthier food.*

*Improves farmers' economic stability..*

*Helps fight climate change.*

### ***Conclusion***

*Sustainable agriculture is key to feeding the world while protecting the planet.*

*Adopting eco-friendly farming ensures a greener future for all.*

*Disha Mishra  
Class-BSC 3rd (Non Med.)-22PHY034*

## **Roots of Science -PHYSICS**

*Physics aims to describe the function of everything around us, from the movement of tiny charged particles to the motion of people, Cars. In fact, almost everything around you' can be described quite accurately by the laws of physics. Consider a smart phone; Physics describe how electricity interacts with the various circuits inside the device. This knowledge helps engineers select the appropriate material and circuit layout when building the small phone, Consider GPS System ; Physics describe the relationship between the speed of an object, distance over which it travels, the time it takes to travel that distance using , equations based on the law of physics.*

### **Physics and other Fields :**

*The study of physics makes other science easier to understand. Physics has many applications in Chemistry, biological Science. In Chemistry deals with interactions of atom and molecule. The study of matter and electricity in physics is fundamental towards the understanding of Concept in chemistry such as Covalent bond. Most branch of engineering are applied physics. In biological science, the microscope level, it describes properties of cell wall , Cell membrane. Physics involved in medical such as X-Rays, MRI etc.*

Bhumika Thakur  
B.Sc. Ist Year-24PHY001

## **SCIENCE**

### **By Martin Dejnicky**

*Everything works, because of science.  
Even your old kitchen appliance.  
What about your mom's car ?  
Without science, it wouldn't go far.  
With science we could make,  
a computer or phone,  
If you want a twin,  
just ask for a clone.  
Science will explain,  
nature and trees,  
It's also used,  
to find cures for disease.  
Science is cool,  
the evidence is clear,  
It's so much fun,  
enjoy it my dear.*

Sheha

B.Sc. 3rd Non Medical

### **The Wonder of Science**

*Science is light, so bold and bright,  
Unveiling truths, revealing sight.  
From stars above to oceans deep,  
It wakes the world from endless sleep.  
The atoms dance, the planets spin,  
A universe, both vast and thin.  
Electric sparks, the engines roar,  
Science opens every door.*

Mahak

Bsc 3rd Year-22PCH026

## ***Human Gut Microbiome and Its Health Benefits***

### **1. Introduction**

*The human gut microbiome is a vast community of trillions of microorganisms, including bacteria, viruses, and fungi residing in the digestive tract. These microbes play a pivotal role in maintaining overall health by aiding digestion, regulating immunity, and influencing mental health.*

### **2. The Composition of the Gut Microbiome**

*The gut microbiome consists of diverse species, including beneficial bacteria like *Lactobacillus* and *Bifidobacterium*. Factors such as diet, genetics, and lifestyle influence its unique composition in individuals.*

### **3. Global and National Initiatives on Gut Health**

- 👉 In 2001 WHO and FAO defined probiotics as 'live microorganisms which, when administered in adequate amounts, confer a health benefit on the host.'
- 👉 The 'Probiotic Guidelines' by WHO emphasize rigorous testing for safety.
- 👉 In 2020, the Indian Council of Medical Research (ICMR) launched studies on gut health.
- 👉 The National Health Mission (NHM) India integrates nutrition programs for better gut health.
- 👉 The Ministry of AYUSH promotes fermented foods such as curd and buttermilk.

### **4. Factors Affecting the Gut Microbiome**

- 👉 Diet: High-fiber and fermented foods support beneficial bacteria, while processed foods harm them.
- 👉 Medications: Overuse of antibiotics (disrupts) microbial balance.
- 👉 Stress and Sleep: Chronic stress negatively impacts the microbiome.
- 👉 Environmental Factors: Pollutants and toxins alter microbiome diversity

### **5. How to maintain a Healthy Gut Microbiome.**

#### ***Human Gut Microbiome and Its Health Benefits***

- 👉 Eat a balanced diet rich in fruit, vegetables and fermented foods.
- 👉 Stay hydrated to maintain gut lining integrity.
- 👉 Exercise regularly to enhance microbial diversity.
- 👉 Avoid unnecessary antibiotics to prevent imbalance.

### **6. Conclusion**

*The gut microbiome profoundly influences digestion, immunity, and mental well-being. By adopting gut-friendly habits and supporting research initiatives, we can pave the way toward a healthier future.*

Shruti Verma  
B.Sc 2nd Year - 23Z00040

## Invisibility

Invisibility, one of the most tantalizing powers in fiction, spans all kinds of stories, but could this fantasy ever become a reality? Invisibility is a relative term. Researchers and scientists working on stealth technology have developed planes nearly undetectable to radar and cloaks that conceal tanks from thermal cameras, but these don't make objects invisible to human eyes. Our eyes see by taking in visible light waves that reflect off objects. To make objects invisible without turning off the light, our eyes would need to see the light from behind the subject rather than the light bouncing off the object itself, and to do that, we need to control visible light waves. One way to do this is through reflection, but this method is predictable and requires maintaining angles too precise for most moving objects. Another method is to absorb light with ultra-black surfaces covered in light capturing nanotubes. However, painting something black doesn't make it invisible, so scientists are trying to reroute light waves around the object using refraction. Refraction describes how light changes direction when moving from one material to another with different density. For instance, when light moves from a less dense medium to a denser medium, its path bends slightly. Consider how someone's legs appear distorted when sitting at the edge of a pool since water is denser than air, light refracting from water to your eyes bends and speeds up. In nature, this effect has limits, as light can only bend to a certain extent when passing through natural materials. But in labs, we can shatter those limits. In 1990, physicist John Pendry, working with a defense lab, created a material to absorb radar waves. The result was a mess of carbon fibers so thin and densely woven that they interacted with light in an entirely different way than regular carbon. This inspired him to try similar tricks with other materials. By altering them on a microscopic level, Pendry added microstructures capable of bending and reflecting light in ways previously thought impossible. He called this technology materials and developed an intriguing example, the split-ring resonator, which allows light to bend past its theoretical limit.

The discovery of negative refraction kicked off the modern wave of invisibility research. To date, labs have designed metamaterials that can completely steer away microwaves. However, a true invisible cloak would need to bend all wavelengths of visible light simultaneously and without distortion, which is difficult because refraction doesn't treat all wavelengths equally, as seen when refractive materials produce rainbows. Despite leading the field, metamaterials aren't the only route to achieve invisibility. One lab created a controlled desert mirage using hot air just above the ground to refract cooler air around it, creating distortions and illusions.

Unfortunately, this method only works at high temperatures. Another lab used a unique configuration of glass lenses to bend light around an object with a ring-shaped area, large enough to obscure an entire person, though it only works when the observer and the object are in precisely the right position. Attempts to use cameras to record the environment and project it over a cloak have been hindered by lag and color distortion. These efforts, along with others, have a long way to go before bringing this magical technology to life. However, one thing about science is certain: the limitations we see today could simply disappear.

Dheeraj Kumar  
B.Sc 2nd Year-23PHY008

### **Did You Know Facts ?**

Here are a few science facts that will make your day and increase your interest in Science. Take a look :

- Helium has the ability to work against gravity. When helium is cooled to near-absolute zero temperatures (-460 degrees Fahrenheit or -273 degrees Celsius), it becomes a superfluid, which means it can flow without friction.
- Water can exist in three states at the same time. This is known as the triple boil or triple point and it is the temperature and pressure at which materials exist as a gas, a liquid, and a solid all at the same time.
- Bananas are radioactive. Bananas contain potassium, and because potassium decays, the yellow fruit becomes slightly radioactive.
- Humans have inherited genes from other species. Our genome contains up to 145 genes mutated from bacteria, fungi, other single-celled organisms, and viruses.
- The Majority of Earth's Oxygen is produced by Oceans.  
Lights take almost eight minutes to proceed from the sun to earth.
- Grasshoppers have ears in their bellies.  
A cockroach has the ability to live for up to one week without its head.
- Lizards use their tongue to smell.
- A cloud can be as heavy as a million pounds.
- We can't burp in space.  
Men suffer from colour blindness more than women.
- An individual blood cell takes around one minute to create a complete circuit of the body.
- Bar code scanners read the white space between the black lines rather than the black lines themselves.
- Sea animals use Earth's Magnetic Field to know their location.
- Our planet has more trees compared to stars in the solar system etc.

Diksha Thakur  
(23MSCCHEM001)

## **UNDERSTANDING CLIMATE CHANGE : A GLOBAL CHALLENGE**

*Climate change is one of the most pressing issues of our time. It refers to long term shifts in weather patterns and global temperatures due to natural processes and human activities primarily the burning of fossil fuels, deforestation and industrial processes. These activities release greenhouse gases like carbon dioxide (CO<sub>2</sub>) and methane (CH<sub>4</sub>) into the atmosphere trapping heat and causing the planet to warm.*

### **CAUSES OF CLIMATE CHANGE**

1. *Greenhouse Gas Emission : The burning of fossil fuels for Energy transportation is the Leading contributor to climate change Co<sub>2</sub> emission from power plants, factories, and vehicles significantly increase atmospheric heat.*
2. *DEFORESTATION : Trees absorb Co<sub>2</sub> from the atmosphere, when forests are cut down for agriculture or urban development, this carbon - absorbing capacity is lost.*
3. *INDUSTRIAL ACTIVITIES Manufacturing processes and industrial operations release pollutants and greenhouse gases into the air.*
- 4) *AGRICULTURE : Livestock farming produces large amounts methane a potent greenhouse gas. Fertilizer also Contributes to nitrous oxide emissions.*

### **IMPACTS OF CLIMATE CHANGE**

1. *RISING TEMPERATURE - Global temperatures have been steadily increasing causing heat waves and affecting ecosystem.*
2. *MEALING ICE CAPS AND RISING SEA LEVELS : The Arctic and Antarctic regions are losing ice, leading to rising sea levels that threaten coastal communities.*
3. *EXTREME WEATHER EVENTS CLIMATE Change has been linped to more frequent and secure hurricanes, floods, droughts and wild fires.*
4. *IMPACT ON BIODILERSIT : Many species are at risp of extinction as their habitats, 'are destroyed or' altered by changing climates.*
5. *HUMAN HEALTH RISKS : Increased temperatures and pollution levels contributes to respiratory diseases, heat - related illnesses, and spread of vector boone diseases like malaria.*

### **SOLUTIONS TO CLIMATE CHANGE**

1. *RENEWABLE ENERGE: Transitioning to clean energy sources Such as solar-wind and hydroelectric power can significantly reduce greenhouse gas emissions.*

2. **AFFORESTATION AND REFORESTATION** - Planting trees and restoring forests can help absorb atmospheric Co2.
3. **ENERGY EFFICIENCY** : Improving energy efficiency in buildings transportation, and Industries can reduce Carbon footprint."
4. **SUSTAINABLE AGRICULTURE** : Adopting practices that reduce methane emissions and promote soil health can help mitigate agricultural impacts. What Can individuals do?

1. **REDUCE ENERGY USE**-Use energy efficient appliances anal switch of devices when not in use .
2. **ADOPT SUSTAINABLE TRANSPORTATION** : Use public transportation car pool switch to electric vehicles.
3. **SUPPORT SUSTAINABLE PRODUCTS** : Choose eco-friendly and locally produced goods.
- 4 **Advocate for policy chance** : Support policies and initiatives aimed at addressing climate change.

*Conclusion : Addressing climate change requires collective action from government industries and individuals while the challenge is significant, innovative solutions and global cooperation offer hope for a more sustainable future.*

*Shivani Sharma*

*M.Sc Chemistry-23MSCCHEM029*

## **FACT ABOUT CHEMISTRY**

1. **WE MAINLY BREATHE NITROGEN !**

*Air is 78% nitrogen, while oxygen (O<sub>2</sub>) only makes upto 21% of the air we breathe. The content of carbon dioxide (CO<sub>2</sub>) in the air is not more than 0.03% and the remaining gases (Ar) (H<sub>4</sub>) (H<sub>2</sub>) water vapor) do not make up more than 1%.*

2. **THE METAL GALLIUM CAN MELT IN THE HAND :**

*The meting temperature is about 29.8 oC.*

3. **COPPER AND BORON MAKE FLAMES TURN GREEN :**

*If you add compounds of copper or boron to alcohol, it will Burn with a green flame.*

4. **A LITER OF SEA WATER CONTAINS 35 GRAMS OF SALT**

*A liter of sea water contains 35 grams of salt, more than half of which which is sodium chloride The rest is mainly calcium and magnesium chloride and sulfates, which give sea water a better taste.*

5. **RAINWATER HOLDS VIT-B12.**

6. *If you remove all the empty space in the atoms of all people on earth, the entire human race could fit in a sugar cube.*

*Reetika Thakur*

*B.Sc 3rd Year-22PCH005*

## ***World from the Eyes of Science***

*Without science, there is no human development, technological progress, knowledge generation and the world we knew, it would not exist if we did not invest in science. The world would come to a half if science did not exist. So here, there are some Investing things which we see everyday but they are much more interesting when we see them form the eyes of science.*

*The oceans produce the majority of the oxygen on Earth According to the National Oceanic Service, we can thank plant-based marine organisms for all that fresh air: More than half of the of the world's oxygen is produced by plankton, seaweed and other photo synthesizers.*

### ***Soil is full of life***

*There are more people microorganisms in one teaspoon of soil than people on the planet. “Millions of species and billions of organisms (bacteria, algae, microscopic insects, earthworms, betties, ants, miter, fungi and more) represent the highest concentration of biomass anywhere on the planet” according to the report.*

### ***About half of your body is bacteria***

*Experts estimate that the human body consists of 30 trillion human cells and 39 trillion bacteria and (roughly 1: 1.3 ratio) in the past, researches thought we were much more bacteria than human, with a ratio of 10:1*

### ***It can rain diamonds on other planets***

*The atmospheres in Neptune, Uranus and saturn have such extreme pressure that they can crystallize carbon atoms and turn them into diamonds, American Scientist reports. Researchers were able to create the correct Conditions in a lab to prove this occurs on Neptune and Uranus. Separately, other researchers speculate that it may rain as such as 22 million pounds of diamonds on parts of Saturn every year.*

Roll No. 22BSM023*

## **DISCOVERY OF T-CELL**

*Making a breakthrough in cancer treatment a new type of immune cell that kills most cancers was discovered by researchers at Cardiff University's School of Medicine. The discovery of T cells was found highly unusual and this discovery could further be helpful in universal cancer therapy. It was serendipitous finding. The unexpected discovery was made when the researchers were analyzing blood samples for immune cells which could fight against bacteria. They accidentally discovered T cells a never before seen receptor which catches only cancerous cells ignoring healthy cells. The scientists discovered T-cells equipped new type of receptor known as T-cell receptor (TCR). It identifies and kills most human cancer cells. It easily identifies healthy cells and cancerous cells. Cancerous cells containing abnormal proteins are eliminated by T-cells. Small parts of cellular proteins that are bound to human leukocyte antigen (HLA) are identified by scanning system, this allows killer T-cells to see what's occurring inside cells. Researchers prevented creating a single T-cell based treatment that targets most cancers in all human beings because HLA varies between individuals. A unique TCR was identified by the Cardiff researchers which recognizes several kinds of cancer via a single HLA like molecule called MRI. T-cells equipped with the new TCR were shown, in the lab to kill lung, skin, blood, colon, breast, prostate, ovarian, kidney and cervical so far various studies on mice have yielded very encouraging results. According to an expert in T cell from Cardiff University it was highly unusual to find a TCR with such broad cancer specificity which raised the prospect of universal cancer therapy. As per the researchers, Lucia Mori and Gennaro De Libero from the university of Basel in Switzerland, the research is in budding stage and has great potential to be exposed as a future of cancer medicine Awen Gallimore of the University's division of infection and immunity and cancer immunology lead for the Wales Cancer Research Centre, said: " If this transformative new finding holds up. It will lay the foundation for a 'universal T-cell medicine, mitigating against the tremendous costs associated with Identification, generation and manufacture of personalized T-cells.*

*Vikas Thakur*

## संपादकीय

मानव जीवन में भाषा का प्रमुख स्थान है। भाषा जहाँ वैश्विक स्तर पर हमारी पहचान करवाती है वहीं राष्ट्रीय एकता, मानव मूल्यों और भारतीय संस्कृति का ज्ञान भी प्रदान करती हैं जिसका प्रमुख उदाहरण मध्य प्रदेश एम्बीबीएस की पढ़ाई हिन्दी में करवाने वाला भारत का पहला राज्य है। इस प्रकार आज के इस तकनीकी युग में भाषा केवल साहित्यिक क्षेत्र में ही नहीं अपितु तकनीकी क्षेत्र में भी महत्वपूर्ण भूमिका निभा रही है।

यह अत्यंत हर्ष का विषय है कि महाविद्यालय की 'व्यास पत्रिका' का प्रकाशन किया जा रहा है। यह पत्रिका महाविद्यालय की वर्ष भर की गतिविधियों का आईना है। यह पत्रिका साहित्यिक पदार्पण के लिए एक मंच का कार्य करती है। इसमें सभी विद्यार्थियों ने अपने भावों को कविताओं, कहानियों और लेखों के द्वारा संजोया है। इसमें विद्यार्थियों के विचारों, कल्पनाओं और प्रतिभा का सुन्दर समन्वय है।

मैं आशा करती हूँ कि पत्रिका में प्रकाशित मूल्यवान सामग्री विद्यार्थियों के चरित्र-निर्माण, नैतिक मूल्यों और सशक्त व्यक्तित्व निर्माण में सहायक सिद्ध होगी। इन्हीं मंगल कामनाओं के साथ मैं सभी विद्यार्थियों को उनके उज्ज्वल भविष्य के लिए शुभकामनाएं देती हूँ।

डॉ. हेमा देवी ठाकुर  
सहायक आचार्या  
हिन्दी – विभाग

## सम्पादकीय

प्रिय पाठकों,

मुझे यह लिखते हुए अत्यन्त प्रसन्नता हो रही है कि राजकीय स्नातकोत्तर महाविद्यालय बिलासपुर की वार्षिक पत्रिका 'ब्यास' का संपादन किया जा रहा है। यह हम सभी के लिए हर्ष का विषय है। हमारे महाविद्यालय में अनेक गुणवान्, प्रतिभावान् विद्यार्थी हैं जिनमें बहुत-सी प्रतिभाएं छिपी हैं। आवश्यकता है तो बस उन प्रतिभाओं को समाने लाने की। यह पत्रिका केवल मनोरंजन का साधन ही नहीं अपितु विद्यार्थियों की अभिव्यक्ति का माध्यम है जिसके द्वारा वे अपनी प्रतिभा, कल्पना और विचारों को सहजता से व्यक्त कर सकते हैं। पत्रिका में मूल्यवान् सामग्री विद्यार्थियों के चरित्र निर्माण, नैतिक मूल्यों और सशक्त व्यक्तिकरण के विकास में सहायक होगी।

हर विद्यार्थी की सफलता की पीछे गुरु का मार्गदर्शन महत्वपूर्ण होता है। गुरु के बिना जीवन अधूरा है। जीवन में हम कोई भी कार्य करते हैं उसमें हमें गुरु या किसी मार्गदर्शक की आवश्यकता पड़ती है। गुरु के मार्गदर्शन से कार्य आसानी से सफल हो जाते हैं। मैं हिन्दी-विभाग की छात्रा साक्षी हृदय तल से धन्यवाद करती हूँ हिन्दी-विभाग की सह-आचार्य डॉ हेमा देवी ठाकुर का जिन्होंने मुझे संपादक का दायित्व सौंपा और मुझे सहयोग देकर इस कार्य के योग्य समझा। इस कार्य को सम्पन्न करने में उन्होंने अपना बहुमूल्य योगदान दिया।

मैं धन्यवाद करती हूँ सभी विद्यार्थियों का जिन्होंने अपने बहुमूल्य विचारों, भावों एवं कल्पना को शब्दों में पिरोकर इस पत्रिका के माध्यम से पाठकों के समक्ष प्रस्तुत किया। मेरी ईश्वर से प्रार्थना है कि आप सभी जीवन के हर क्षेत्र में दिन दुगुनी रात चौगुनी उन्नति करें !!!

## कुरुक्षेत्र

कुरुक्षेत्र में भीड़ लगी महापुरुषों और वीरों की  
रणभूमि में प्यास बूझेगी कई तलवारों और तीरों की  
कुरुक्षेत्र के मध्य पहुंच अर्जुन हो गए मूँग्रस्त  
कहा कैसे मैं युद्ध करूँ मेरे अपने ही हैं मेरे समक्ष !

मुझे गोद में उठाकर पितामाह मन ही मन मुस्काते थे  
बाल्यकाल में मेरी जिह पर घोड़ा वे बन जाते थे  
मुझमें जो भी ज्ञान भरा , वो गुरु द्रोण से सीखा है  
किस प्रकार प्रहार करूँ , केशव ये कैसा तरीका है ?

श्रीकृष्ण – ये कैसी नपुंसकता तेरे हृदय में आई ?  
मन की तुच्छ दुर्बलता क्षत्रियों का व्यवहार नहीं  
अपने होकर अपनत्व तुमने पाया है ?  
अपनों ने भी क्या कभी अपना धर्म निभाया है ?

न कोई गुरु , न सखा , न कोई भाई है  
चिरहरण में पांचाली की लाज क्या इन्होंने बचाई है ?  
छोड़ो ये भ्रम पार्थ ! कि सब तुम्हारे हैं  
आज गांडीव हाथ धरे केवल तुम्हें निहारे हैं !

अर्जुन तुम्हारा धर्म सिर्फ लड़ना है  
अन्याय को धराशाई करना है ।

मैं कौन हूँ पार्थ ! इस बात का नहीं तुम्हें कोई ज्ञान  
हो तुम भोले और थोड़े अनजान !  
इस पृथ्वी का मैं सार हूँ , सृष्टि का आधार हूँ  
तुम केवल युद्ध करो इस जग का मैं ही पालनहार हूँ !

अंत में नारायण ने अपना विश्व रूप दिखा डाला  
देख रूप मधुसूदन का अर्जुन ने धैर्य संभाला  
माधव ! तुमने दिशा दिखाकर  
मेरा उद्धार कर डाला !

शस्त्र उठाकर अर्जुन ने दुष्टों का संहार किया  
कुरुक्षेत्र में यज्ञसैनी के अपमान का बदला लिया  
पाकर ज्ञान गीता का धर्म का सम्मान किया  
हस्तिनापुर की गद्दी पर धर्मराज को विराजमान  
किया !!!

## मातृभाषा

हिन्दी है हमारी मातृभाषा  
इसलिए है इससे सबसे पहले हमारा नाता !  
छोड़ नहीं सकते हिन्दी को  
क्योंकि यही है हमारी भाग्यविधाता !  
जैसे एक बच्चा माँ बिना अधूरा है  
हिन्दी है हिन्दू की शान  
इसलिए इस पर है अभिमान !  
युवाओं की आवाज़ है हिन्दी  
वतन की पहचान है हिन्दी !  
हिन्दी के क्षेत्र को बढ़ाना है  
हिन्दी को सभी के दिलों में बसाना है  
हिन्दी को प्रथम स्थान दिलाना है !!!

कामना

बी०ए० तृतीय वर्ष

## प्रकृति

हुआ जब मनुष्य उत्पन्न  
थी प्रकृति बहुत सुंदर  
चारों तरफ हरियाली का वातावरण  
झूम रहे जैसे धरती और गगन !  
थी चारों ओर चिंडियों की चहचहाट  
कोयल की मीठी-सी आहट  
कल-कल करते झरनों की झर-झर  
थी प्रकृति निर्मल और स्वच्छ !  
बाद में मानव मस्तिष्क जाग उठा  
चारों ओर उद्योगों का मेला लगा दिया  
सोचा उसने वह अर्थव्यवस्था का विकास करेगा  
किंतु उसे क्या मालूम कि वह प्रकृति का विनाश  
करेगा !  
वायु में धुलती जहरीली गैसें  
नदियों में तैरती बोतलें, लिफाफे  
जीव-जन्तुओं का भी करता विनाश  
और मानव समझता इसे विकास !  
अपने निवास के लिए दूसरों के निवास छीन लिए  
पेड़ों को काट पक्षियों के मकान छीन लिए  
अब घरों के गमलों में पौधे लगाता है  
इंटरनेट पर फोटो लगाकर खुद को प्रकृति प्रेमी  
बताता है !  
प्रकृति का मानव ने कर दिया विनाश  
पर अभी है तुम्हारे पास मौका एक खास  
इसलिए एक-एक पेड़ लगाओ  
जन्मदिन पर केक न काट पेड़ लगाओ !

इधर-उधर कूड़ा न फैलाओ  
ओरों को भी न फैलाने का सन्देश पहुंचाओ  
क्योंकि प्रकृति स्वच्छ है तो मनुष्य स्वस्थ है  
प्रकृति के बिना मानव का जीवन व्यर्थ है!!!

## बेटियां

संकुचित सोच से निकलकर देखा  
हकीकत में क्या हो रहा है ? तो पाया  
आज हिमाचल की बेटियां अपनी मंजिल तक पहुंच  
कर गगन चूम रही हैं !  
बेटियों को बोझ न समझो मेरे यारो !  
बेटियां हमारी पहचान हैं  
इनके नहें कदमों से घरों की  
बगिया महक उठती है !  
एक बेटी दो आंगनों को महकाती है  
बेटी है तुलसी आंगन की  
चाँद-सी शीतल होती है बेटियां  
जिस घर में जन्म लेती है बेटियां  
उस घर को स्वर्ग के समान महकाती हैं बेटियां !  
नहीं करना चाहिए अपमान बेटियों का  
न ही इनका तिरस्कार करो  
क्योंकि आज बेटियां किसी से कम नहीं  
मंजिल तक पहुंचकर आसमान को चूम रही हैं  
बेटियां !

## माया का घेरा

मोह माया को त्याग कर ही  
हर पथिक पार जा पाया है  
यहां पर कोई न तेरा है  
न तो सोच कोई मेरा है!  
काया डूबी जिसमें तेरी  
ये जगत सारा मोह माया है  
यहां पर कोई न तेरा है  
न तो सोच कोई मेरा है!  
धन दौलत संग न जाएगी  
न संग जाएंगे तेरे बंधन  
जिन्हें तू कहता अपना—अपना  
कुछ ही दिनों में भूल जाएंगे!  
अगर पाप कर्म में लिप्त रहेगा  
तेरा जीवन चक्र न छुटेगा  
न कोई तेरे बदले में  
नरक के चक्कर काटेगा!  
अभी वक्त है संभल पथिक  
सम्पूर्ण जगत एक माया है ।  
'प्रेमानन्द महाराज' जिन्होंने  
जीवन चक्र बतलाया है  
'कृष्णाय वासुदेवाय' एक मन्त्र जो  
'गुरु प्रेमानन्द' ने बतलाया है  
सत्यकर्म को करते—करते  
राधा—कृष्ण रटते जाना है !  
ये जग सारा नश्वर है  
जो नश्वर नहीं वो ईश्वर है  
पूर्ण से भी परिपूर्ण जो  
अनन्त काल से जिसकी छाया  
वही तो है ईश्वर की माया !  
एकाग्र होकर ध्यान लगाओ

यही शान्ति का मार्ग है  
जिसने पाया मोक्ष को  
वही हमारा 'प्रेमानन्द' है !!!

## मैं कौन हूँ ?

मुझसे मत पूछो मैं कौन हूँ?  
मैं खुद का ही गुनहगार हूँ!  
मैं एक लाश हूँ  
जो बस जली नहीं  
मैं एक साया हूँ  
जो कभी ढला नहीं!  
मैं अंधेरा हूँ  
जो उजालों से डरता है  
मैं वो सच हूँ  
जो खुद से ही लड़ता है!  
मैं टूटी हुई एक सिसकी हूँ  
जो रात में गुंजती रहती है  
मैं बेजान ख्वाबों का टुकड़ा हूँ  
जो आंखों में टूटती रहती है!  
मुझसे मत पूछो मैं कौन हूँ?  
मैं खुद का ही गुनहगार हूँ !!!

मुस्कान  
कला स्नातक प्रथम वर्ष

## कोशिश

लोग कहते हैं मेरे चेहरे पर मुस्कान बहुत है,  
इस धुएँ में मेरी पहचान बहुत है!  
छेद तो बहुत है मेरी कश्ती में लेकिन,  
इस कुश्ती में लड़ने के अरमान बहुत हैं!  
ना उम्मीद तो हुआ हजारों बार मगर,  
उस दिल में उम्मीदों के मकान बहुत हैं!  
टूटे पत्तों से रबाब सजाने वाला हूँ मैं,  
सूखे पत्तों पर मुझे आस बहुत है!  
दो लप्जों में बँटे मेरे अक्षर देखो,  
इस नाचीज का यहाँ नाम बहुत है!  
मेरी कोशिश हारी कितनी मर्तबा देखो,  
हर कोशिश पर मुझे गुमान बहुत है!!!

दिक्षांत ठाकुर

कला स्नातक प्रथम वर्ष

## कहानी का किरदार

किरदार चाहे जो भी हो मगर  
कहानी हसीन होनी चाहिए  
सफलता का शिखर मिलने पर भी  
पैरों के नीचे जमीन होनी चाहिए।  
यूं तो मौत की चादर ओढ़ ही लेंगे साथी एक दिन  
पर जिंदगी है तो जिंदगी रंगीन होनी चाहिए।  
इस पार हूँ या उस पार हूँ  
संभला हुआ हूँ या तार-तार हूँ  
मेरे-तेरे इसके-उसके रिश्तों की कश्मकश में तो  
सभी लोग रहते हैं  
मगर रिश्ते हैं तो निभाने की तहजीब होनी चाहिए।  
सजते संवरते तो सभी लोग हैं आजकल  
पर उनमें थोड़ी सादगी की मिलावट भी होनी  
चाहिए।  
ये जिंदगी खेल है दो दिन का  
कल सुंदर सपना है  
सपनों का किरदार तो बन गए  
मगर किरदार शालीन होना चाहिए।  
लेकिन एक बात तो सुनते जाओ  
कहानी चाहे जो भी हो  
किरदार हसीन होना चाहिए !!!

कला स्नातक तृतीय वर्ष

## वो दिन

कहां गए वो दिन ?

जब एक नहीं, दो नहीं  
तीन-तीन समय पेट भर खाना मिलता था ।  
जब घर के कोनों में खामोशी नहीं  
रौनक भरा ज़माना मिलता था  
जब गलती कर देने पर उपेक्षा नहीं  
प्यार भरी डांट और समझाना मिलता था  
फिर याद आया कि गलती तो आखिर किसी  
की नहीं ।

ये समय ही कमबख्त है  
किसी के पास टिकता ही नहीं  
अब कहां मिलता है समय बिताने को  
दो पल बैठ कर अपनों के साथ  
खाना खाने को, बाहर जाने को  
अरसे हो गए ।

एक-दूसरे की मनोवृत्ति जानने को  
किश्तें देकर तो मुश्किल से  
एक 'इतवार' खरीदा था  
एक बार नहीं, बार-बार खरीदा था  
वो भी बीत गया, जिंदगी की कश्मकश में  
या यूं कहें जिंदगी ही बीत गई  
इस विचार की कश्मकश में  
सोचते रहे, खोजते रहे  
कि आखिर  
कहां गए वो दिन ?

कला स्नातक तृतीय वर्ष

## पर्यावरण प्रदूषण

पर्यावरण का अर्थ है वातावरण जिसमें हम रहते हैं । हमारे आस-पास की सभी वस्तुएं हवा, पानी, मनुष्य, पशु-पक्षी सभी मिलकर पर्यावरण का निर्माण करते हैं ।

पृथ्वी पर सभी जीवों को जीवन जीने के लिए पर्यावरण से हमें भोजन, जल, औक्सीजन सभी जरूरत का सामान प्राप्त होता है ।

आधुनिक युग में बढ़ते हुए प्रदूषण के कारण आज हमारा पर्यावरण प्रदूषित होता जा रहा है । पर्यावरण के प्रदूषित होने में मानव का बहुत बड़ा हाथ रहा है । आज मानव समाज में औद्योगीकरण और शहरीकरण के साथ पर्यावरण में बढ़ते प्रदृष्टि को हम रोक नहीं पाए ।

उद्योगों से निकलता धुआं, कचरा और चलते वाहनों के शोर-शराबे से वायु, मृदा, जल सभी प्रदूषित हो रहे हैं ।

क्योंकि पर्यावरण हमारी माँ समान है । हम सभी प्राणी जीवन जीने के लिए पूरी तरह से पर्यावरण पर निर्भर हैं । बिना इसके पृथ्वी पर जीवन संभव ही नहीं है । इसलिए हमें अपने पर्यावरण को प्रदृष्टि से बचाने के लिए आगे आना होगा !!!

शिवानी देवी

कला स्नातक प्रथम वर्ष

## हिंदी भाषा

अंग्रेजी में नंबर थोड़े कम आते हैं,  
अंग्रेजी बोलने से भी घबराते हैं,  
पर स्टाइल के लिए पूरी जान लगाते हैं,  
क्योंकि हम हिंदी बोलने से शर्माते हैं।

एक वक्त था जब हमारे देश में,  
हिंदी का बोलबाला था  
माँ की आवाज़ में भी सुबह का उजाला था,  
उस माँ को अब हम Mom बुलाते हैं,

क्योंकि हम हिंदी बोलने से शर्माते हैं।

देश आगे बढ़ गया पर हिंदी पीछे रह गई,  
हिंदी भाषा से अब हम नजर चुराते हैं,  
क्योंकि हम हिंदी बोलने से शर्माते हैं।

माना अंग्रेजी भाषा पूरी दुनिया को चलाती है,  
पर हिंदी भाषा भी तो हमारी पहचान  
दुनिया में कराती है,  
क्यों न हम अपनी मातृभाषा को, फिर से सर  
आंखों पर बिठाएं,

आओ हम सब मिलकर हिंदी भाषा को  
जन-जन तक पहुंचाएं !!!

मोनिका ठाकुर

कला स्नातक तृतीय वर्ष

## अम्बर

ये नीला अम्बर  
कह रहा है कुछ अनुपम-अमूल्य संदेश  
कहता शांतिमय संदेश जन-जन को  
न जाने क्या कहता ये अम्बर !

यह कटु समाज कौन जाने अपना  
स्वार्थी, हठी जन वाणी न देती विराम  
ईर्ष्यालु, चुगलखोर न स्वयं न अन्य को  
देते राह,  
सफलता न देखी जाए !

न जाने क्यों है ये समाज  
दिखाते हैं राह उस अंश को  
उमड़ते कृष्ण धन अम्बर में  
बनाता शुद्ध परमात्मा का अंश !

हे विधाता ! दिखा राह उस अंश-आत्मा को  
बनो अंबर इस महायुद्ध में  
यह संसार परीक्षा बनाता अंबर समान  
न जाने क्या कहता ये अम्बर ?

तनीषा कुमारी  
कला स्नातक द्वितीय वर्ष

## बस का सफर

दिल में सफर की उत्सुकता थी,  
थोड़ी-थोड़ी व्याकुलता भी थी!  
जब मैं बस में चढ़ी,  
बैठी मैं खिड़की के पास  
हो रहे मिले-जुले एहसास!  
बस में थी भीड़,  
और धक्के ही धक्के  
यात्री थे अनुभवी और पक्के  
भीड़ कभी आगे धकेले  
कभी पीछे धकेले!  
नज़र जब बस से बाहर जाती,  
मनमोहक दृश्य दिखाती,  
जब देखो खिड़की के बाहर,  
मिले-जुले दिखते हैं मंजर!  
कहीं देखो बाजार सजा है,  
कहीं पर लगी है बहुत भीड़,  
कहीं पर दिखे बच्चे जाते स्कूल!  
पल-पल सफर बढ़ता जाता,  
नए-नए अनुभव करवाता!  
आया नज़र खेत-खलिहान,  
चारों ओर हरियाली और,  
बोझ ढोता दिखा किसान!  
चारों ओर खेत में गेहूँ की बाली  
आम के बौर से लटकी डाली!  
कहीं-कहीं मोर भी खेतों में नाचे  
कहीं-कहीं ग़इयां बस के आगे भागे!  
पहुंच गई मैं जहां मुझे जाना था  
ये बस का मेरा सफर सुहाना था !!!

## जिंदगी

दुनिया एक महफिल है मुसाफिरों की,  
सब अपने दिल की बात कह रहे हैं।  
कुछ सुना रहे हैं अपना गम,  
कुछ खुद से भी छिपा रहे हैं!  
कुछ जिंदगी देते हैं औरों को  
कुछ खुद को ही मिटा रहे हैं।  
कुछ तड़प रहे हैं औरों के खतिर,  
कुछ खुद को ही ठुकरा रहे हैं  
हर रोज मुसाफिर जा रहे हैं!  
इस तरह इस दुनियाँ में सब,  
अपनी-अपनी जिंदगी बिता रहे हैं।  
कुछ पाने को यहां कुछ खोना पड़ता है  
खुशी जो चाहिए, तो पहले रोना पड़ता है!  
उजाला भी आता है रात के बाद,  
सुबह जागने के लिए रात को सोना पड़ता है,  
मुस्कुराना हो तो पहले जिंदगी को,  
आँसुओं से सीचना पड़ता है!  
मौत को पाना भी इतना आसान नहीं है  
इसके लिए जिंदगी को खोना पड़ता है !!!

## हिमाचल स्वर्ग है...!

क्या है हिमाचल में?

सुकून का दूसरा नाम है हिमाचल,  
कुदरत के एक रूप की खान है हिमाचल।  
मैं निःशब्द-सी क्या कहूँ,  
मेरे जैसे कई लोगों की पहचान है हिमाचल।  
यहां की नदियाँ चंद्रा-भागा, सतलुज और  
व्यास बहती हैं,  
देवी-देवताओं की मान्यता इसे और भी खास  
बनाती है!  
हिमाचल समूह है, बारह ज़िलों का,  
सोलन में शूलिनी माता, शिमला यहां की  
राजधानी है  
कांगड़ा में धौलाधार के ऊंचे पहाड़ों की अलग  
ही अनुभूति है।  
कुल्लू-मनाली एक आकर्षण है बर्फ का और  
किन्नौर ज़िले में किन्नर कैलाश है, जहां होती  
शिव की स्तुति है।  
ऊना, चम्बा, मंडी का अपना इतिहास,  
रहस्यमयी और अनोखा है,  
लाहौल-स्पीति की अपनी कहानी, जिसे सुने  
तो खो जाएं!  
हमीरपुर के किलों का अतीत, और बिलासपुर  
में माता नैना देवी और गोबिंद सागर झील  
तो दिल को छू जाती है!!!  
उत्तर तुम्हारे प्रश्न का.....कि  
क्या है हिमाचल में  
तो सुनो!  
‘हिमाचल स्वर्ग है,  
मेरे लिए कीमती स्वर्ग है !!!’

सुमीता

कला स्नातक

## शिक्षक : ईश्वर का दिव्य वरदान !

कर्म कर तू कर्म कर सिखाया जिसने  
माटी थी और माटी को सूरज से मिलाया जिसने  
पर्वत जैसी बाधाओं पर मार्गदर्शन दिखाया जिसने  
अनुपस्थिति में भी प्रकाश फैलाया जिसने  
करुण मूर्ति, भव्यता से परिपूर्ण हैं वे  
दर्पण सामने रख दूं तो वह भी दिखा देता सूर्य-सा  
तेज !  
ऐसी अनुपम काया बनायी जिस प्रभु ने, स्वयं से  
ऊपर दिया जिसे श्रेय  
वह है ऐसी पुण्य आत्मा  
जो कर रही दूर इस जग के मिटाकर सभी दुःख  
क्लेश !  
अध्यापक कहें या मार्गदर्शी, अनंत है नाम  
जिनका गुणगान कर थकते नहीं बच्चे और गुरु  
अपार !  
दिखा के मार्ग सभी को, हर लेते वे संताप और  
विलाप !  
प्रसन्न मुद्रा और सूर्य-सा तेज  
नतमस्तक होकर सभी लेते हैं शुभाशीष !  
ज्ञानी नहीं परम ज्ञानी हैं वे  
दीपक की तरह देते अंधियारों को फेर !!!

## बेटी बचाओ, बेटी पढ़ाओ !

बाबा मुझे भी देखना है  
रंग जमीन का  
रब का वास्ता है  
मुझे एक मौका दो  
कायनात में आने का।  
तुम्हारी कसम, मैं तुम्हें कभी  
शर्मसार नहीं करूँगी।  
जितनी हदें बताओगे, मैं उन्हें पार नहीं करूँगी  
बेटे की तरह तुम्हारा सिर ऊँचा कर जाऊँगी  
हंसते-हंसते मर जाऊँगी!  
यूँ मुझे कोख में मारकर  
तुम्हें क्या मिलेगा?  
तुम्हारी ही औलाद हूँ  
क्या मेरे जाने से तुम्हारा दिल  
ज़रा सा भी न पिघलेगा?  
बाबा मैं माँ के घर में  
और तुम्हारी दुनिया की दौड़ में  
साथ निभाऊँगी  
बाबा सारी खुशियां तुम्हें दूंगी  
पढ़-लिखकर मैं इतना कमाऊँगी  
तुम्हारी खुशी के लिए बाबा मैं  
हंसते-हंसते मर जाऊँगी...!  
कुछ तो तरस खाओ  
जमाने पे तुम  
बेटियां न होंगी तो  
माँ, बहू, बहन, बीबी  
कहां से लाओगे तुम !!!

## प्राप्ति

मुलज़िम हूँ मैं तेरा जो अक्सर बिना देखे यूँ ही दौड़ा  
चला जाता हूँ

मुखातिब हूँ तेरे फरमान से सो यूँ ही दूर चला जाता  
हूँ

जब-जब फिरती है ये सांसों की माला अक्सर सोच  
में पड़ जाता हूँ

इक दिन चला जाऊँगा तेरी इस कशमकशा भरी  
जिन्दगी से यही सोच के सहम जाता हूँ।

कधे मिलते तो हैं कब्र के लिए, चार, सहारे के लिए  
ढूँढ़ता-ढूँढ़ता थक जाता हूँ!

पीर पराई होती है कहते हो सारे, अब सच मानकर  
ये दर्द का घूंट पी जाता हूँ।

जन्नत मिली न तकदीर में काम लाखों किए

जब तक जीया इन दिल के भिखारियों के बीच, न  
जाने कितनों के चोले गंदे किए।

अब मैं ऐ खुदा! तुझसे मुखातिब होना चाहता हूँ

सिमरता हूँ रोज इन जनाबों को, जो कहते हैं मुझे  
तुझसे मिलवाएंगे

अब मैं तुझे अपने अन्दर खोजना चाहता हूँ।

थक चुका हूँ अब वैरन पड़े अपने ब्बाबों से

तेरी जमीन में दआ के कुछ फूल महकाना चाहता  
हूँ!!!

## घर बन गया मकान

दूर से प्यारी दिखती वो जन्नत बन गया हूँ  
तारीफ सुनने लायक वो इमारत बन गया हूँ  
घर तो मैं पहले हुआ करता था  
अब तो ईंट, पत्थरों से बना वो मकान बन गया हूँ।  
तुम्हारी तरह मैं भी उलझ—सा गया हूँ  
मिलने को तुमसे तरस—सा गया हूँ।  
कर रहा है इंतजार अपने परिवार के आने का  
वरना अकेला अब मैं भी थक—सा गया हूँ।  
दूर से खूबसूरत दिखता हूँ मैं  
पर पास आकर वो खामोशी कोई सुनता नहीं है  
आओ अब तुम इस मकान में तो तुम्हें पता चले  
दीवारों के सिवा यहां बात कोई करता नहीं है।  
साथ मिलकर तुम रहते थे  
तो खुशी से झूम मैं भी उठता था न  
हर सुख—दुःख में साथ मेरा वो परिवार  
जैसा भी था पर घर तो घर लगता था न।  
बारिश लग जाए इस आंगन में  
तो अब कोई नाचता नहीं है  
देखते तो सब हैं हमें  
पर पास आकर कोई पूछता नहीं है।  
चीख—चीख कर कहती हैं वो दीवारें  
कहां गए वो अपने सारे  
छोटी—सी खुशी से झूम उठते थे  
न जाने अब कब देखेंगे हम वो नजारे।  
कहते हैं वो खेत बेचारे  
कब बैठेंगे पास हमारे।  
न जाने कब वो दिन आएगा  
जब ये मकान फिर से घर बन जाएगा।  
नहीं आती खुशबू अब इस रसोई से  
न बर्तनों का टकराव सुनाई देता है  
हंसता—खेलता मेरा वो परिवार  
अब तो तस्वीरों में दिखाई देता है !!!

आशा कुमारी  
कला स्नातक प्रथम वर्ष

## ऐसा तो नहीं था मेरा हिमाचल !

जरा ध्यान से देख अपनी ओर हिमाचल,  
क्या तू अतीत में भी ऐसा ही था ?  
कहां गए तेरे वो सुंदर—सुंदर पहाड़,  
जिनके कारण तू सबका मन मोह लेता था,  
जरा अतीत में देख, तब तू कितना प्यारा था,  
जब हर स्थान पर केवल प्रेम का ही नारा था।  
तेरे सुंदर—सुंदर गांवों में लोगों का बसेरा  
बड़ा ही न्यारा था,  
वन में उन जीव—जंतुओं ने भी अपना जीवन  
अच्छे से गुजारा था,  
तब खेत भी थे हरे—भरे और  
नदियों में अमृत बहता था,  
देवी—देवताओं में आस्था थी और  
मन में ईश्वर बसता था,  
किंतु आज तेरी दशा देख कर  
मन मेरा विचलित हो उठा,  
देवभूमि कहलाने वाला मेरा हिमाचल  
आज नशे की राह पर है चल पड़ा,  
ईर्ष्या, द्वेष और अपराधों ने भी  
आज यहां है राज किया,  
चिछे जैसे राक्षस ने आज युवाओं के भविष्य को  
ही छीन लिया।  
आज तेरी ये दशा देख कर,  
मन में मेरे होती है हलचल,  
क्योंकि .....  
ऐसा तो नहीं था मेरा हिमाचल !!!

कोमल शर्मा

कला स्नातक द्वितीय वर्ष ।

## लौटा दो

लौटा दो वो दिन मेरे जब मैं हार-जीत नहीं  
जानती थी  
चढ़ना और गिरना बराबर था मेरे लिए  
कोशिश करती जाती थी  
उमंग और हर्ष के दस्ताने पहनकर इठलाकर  
गीत गाती थी  
सिर्फ नज़रों से देखती थी सबको अंतर्मन में  
नहीं झांकती थी!  
वस्त्र को मैला देखकर जब मुँह फुलाया करती थी  
छिप जाती थी किसी पर्दे के पीछे धीरे से  
मुस्कराया करती थी  
समुद्रों को भरने की इच्छा न करते हुए बेफिक्र  
होकर सो जाती थी  
मासूम सी आंखों में चंदा मामा को भरकर  
तारों के शहर जाती थी  
लौटा दो मेरे वो खुशनुमा दिन जब मैं इस जग  
को नहीं जानती थी!  
दूसरों की दृष्टि यदि पड़ती तो अनदेखा कर  
दिया करती थी  
सांदिग्ध कोई लगता तो राम-राम आंखें मूँद के  
गुनगुनाया करती थी  
छुता अगर कोई तो माँ का पल्लू पकड़ लेती  
थी।  
कोई कुछ बोलता तो मुँह में बड़बड़ाकर शांत हो  
जाती थी।  
लौटा दो मेरे वो अनजाने पल जिनमें मैं सबके  
दिए हुए धाव अक्सर भूल जाया करती थी!  
बना दो मुझे वहीं चंचल मूर्ख और ढीठ कहीं  
जाने वाली  
बना दो वो ही भोली जो अक्सर सिर नीचे  
करके रो जाया करती थी।

बना दो वही जो कभी भी किसी को खुश  
करने की चेष्टा अक्सर दिल में लाती थी  
लौटा दो वो अनदेखे लम्हे जिसमें अनजाने में  
ही सही मैं किसी को हँसा जाया करती थी !!!

## लक्ष्य का पहला कदम

एक लक्ष्य जीवन का  
परा जीवन देश के नाम है करना  
वो जज्बा कुछ कर गजरने का  
एन.सी.सी. से है मैंने पाया !  
एन.सी.सी. का हिस्सा बन कर पता लगा  
कि एकता और अनुशासन है क्या ?  
किसी एक केडिट की गलती पर  
सभी केडिट का पसीना बहाया जाता ।  
उसके बाद भी जब Senior's  
How is the josh पछते  
तो अधमरी हालत हीने के बावजूद भी  
मुँह में बड़बड़ाते गाना  
'छल गया दिन, हो गई शाम  
जाने दो, जाना है।  
आगे जाके क्या करेगा, पीछे मुँड़ देख  
खाली 1,2,3 चल ।  
कभी गिरते तो कभी हँसते  
बस ऐसे ही सुबह के 9 से शाम के 5 बजते  
ATC में GCI की Physical Troning के बाद  
सांय काल की सांस्कृतिक गतिविधियों में  
हिस्सा लेना  
सारे दिन की थकान को दूर करता  
रात होते ही घर की याद में रोना  
वही ATC के अंतिम दिन घर न जाने का मन  
करता !!!

## ***As we navigate the Future of Commerce***

*We stand on the cusp of a new era where the landscape of business is transforming at an unprecedented pace. The convergence of technology, sustainability, and consumer consciousness is reshaping how we conduct and perceive commerce. For students and aspiring professionals, this period of change presents both challenges and opportunities.*

*One of the biggest challenges in commerce education is bridging the gap between theory and practice. While academic knowledge is foundational, real-world experience is invaluable. Internships and industry collaborations offer students the chance to apply their learning in practical settings, gaining insights that cannot be taught in a classroom.*

*I appreciate the endeavors of the students who have contributed articles on the various aspects of the commerce stream and congratulate Sakshi Rana, student editor for collecting and proofreading the articles well in time. Wish you all a happy and fruitful reading.*

*Dr. B. S. Jaswal  
Editor, Commerce Section*

### ***Student Editorial***

*Dear readers,*

*Success in any endeavor is highly independent on providing for and managing the independence of various segments and functions. It is a journey that calls for focus on integrative ideas and information in various aspects of life especially of business and how they can influence and be influenced by the environment they operate in. It is rightly said that the pen is mightier than the sword. It's the most powerful weapon that one can possess and it is the hope of light in the world of darkness.*

*The college magazine inculcates the young minds and imbites in them habits of thinking and writing by providing a platform to present their creative, productive and innovative ideas and thoughts pertaining to every walk of life. I express my gratitude to the teachers and students of commerce department for their valuable and overwhelming contribution. I specially thank Dr. Jaswal, Editor, Commerce Section, for entrusting me with this responsibility of acting as student editor.*

*Sakshi Rana*

## **Challenges for E-commerce**

*Although Web based e-business has numerous advantages but it has also posed threats on account of its being what is prominently called faceless and borderless. A few cases of moral issues have risen as a consequence of electronic business. Stead and Gilbert reported the accompanying ethical issues identified with e-commerce [Stead and Gilbert, 2001]. A. Privacy Protection has been a critical issue of both present and forthcoming electronic commerce users. Following issues in this regard are generally striking:*

- Not being meddled with, having the ability to prohibit; singular Privacy is an ethical right of every individual.*
- Privacy is “an alluring state regarding ownership of data by different people about him/herself on the perception/seeing of him/herself by different people”*

*B. Security Concerns* Notwithstanding privacy issues, other ethical issues concerned with e-commerce is the security. The Internet offers uncommon simple entry to an unfathomable exhibit to various products and services. The quickly growing field of “click and mortar” and to a great extent unregulated cyberspace have however incited worries about both privacy and information and other ethical issues. Manufacturers often compete with Intermediaries. Online business has given rise to a new practice that is “Disintermediation.” It is a method of wiping out the mediator.

## **Love as in Commerce**

*Love can be called as an Intangible Asset, But it is surely a fixed one. It is also the Goodwill of the Business Firms, Where firms are the human souls. It changes its form as Capital in the Balance Sheet and is the Summation of Commitment & Special Care where the former being Assets & latter as Liabilities. It should always be credited as Net Profit in the Profit & Loss Account, should be debited as surplus in The Income & Expenditure Account. The admission is restricted. Once retired then it is not possible to be Re-registered. If death occurs then the executors Account gets over flooded with Love.*

## **Balance Sheet**

*Whatever we have earned has got to be repaid. What is life ? It is just tallying of Balance. On one side are our assets, on the other, liability. Whether to be received or to be paid it has to be decided. What we give is an asset, what we owe is liability. But remember EFO (Error & Omission excepted). A provision is necessary because "To Err is Human".*

*Shailja Sharma

## **Corporate Social Responsibility**

*"Successful people have a social responsibility to make the world a better place and not just take from it"*

*Corporate Social Responsibility (CSR) : Types and Importance  
Corporate Social Responsibility (CSR) is a business model that considers a company's social and environmental impact in addition to its economic profits. CSR is also known as "corporate responsibility," "corporate accountability," "corporate citizenship," and "sustainability".*

## **Importance of Cost Accounting**

*Cost Accounting is a specialized branch of Accounting that deals with the classification, recording and allocation of Cost.*

*Cost accounting is important because it helps business take better decisions about costs, privacy and profitability. It also helps businesses manage their Cash flow and plan for the future.*

## **Impact of GST on Indian Economy**

*A single tax, a nation wide sweep,  
GST, a change, the markets leap,  
From tangled webs of state to state,  
A unified system, no more to wait.  
The cascading tax, now laid to rest,  
Input credit, a business's best,  
Across borders, good flow free,  
A seamless trade, for all to see.  
Formalization grows, the shadows fade,  
Small firms emerge, no longer afraid,  
Transparency rings, a clear view,  
Tax evasion, less room to accrue.  
The government's purse,  
now well-filled,  
Investment flows, the future thrilled,  
From rural to urban, a boost is seen,  
The Indian economy, now pristine.  
Yet challenges remain, a path to pave,  
For complex issues, solutions to crave,  
But with each step, the vision clear,  
A robust economy, drawing near.*

## **Insurance : An Alternative Social Security**

*Humans are social animals who live in a society. Society has a role to play in an individual's life one of which is of providing protection to an individual. Life Insurance emerged as an alternative to the kind of social security, which we used to get from our security and is a solution where society is just a spectator. Life Insurance is a financial product offered by various insurance companies which provides financial support on the event of loss of life of insured person to its family life which makes it a must. Insurance is the service which provides social security during insurance period on payment of a nominal premium annually or monthly which is also known as term insurance plan. Insurance is becoming more famous as an investment alternative which promises an amount as a sum assured at the expiry of the insurance period in addition to the rise of sources for life. Endowment plan is a currently developed financial product which is a hybrid of term insurance and fixed deposit that offers lowest rate of return to the investors.*

## Deficit Financing

*Definition : When government expenditure tends to exceed public income, the government may resort to deficit financing to meet the deficit in the budget. Keynes organized the idea of deficit financing as a compensatory spending meant to solve the problem of unemployment and depression. Modern economists prescribe deficit financing for developmental purposes. Dr. V.K.R.V. Rao (Indian Economist) defines deficit financing as the financing of a deliberately created gap between public revenue and public expenditure or a budgetary deficit, the method of financing resorted to being borrowing or a type those results in a net addition to national outlay or aggregate expenditure. Deficit financing implies creation of additional money supply. Deficit may be depression deficits and developmental deficits depending upon its use. Developmental deficits are expected to provide stimulus to economic growth by affecting investment, employment, and real income, with their due multiplier and cumulative expansionary effects. On the other hand Depression deficit is advocated on the criterion of the net benefit of public spending as to what extent & would stimulate private investment and bring forth recovery. Deficit financing for developmental purpose is sorted to mainly because, when the government in an underdeveloped country takes up the responsibility of promoting economic growth, it has to compensate for the lack of private investment through expansion of public sector. But, due to lack of current resources at its disposal, it normally finds it difficult to finance the huge public outlay necessary for accelerating the growth level. Since, due to overall poverty in an underdeveloped country, taxation has a narrow coverage and the mal voluntary savings are very low on account of low per capita income and the high marginal propensity to consume, the government tends to mobilize sources from high consumption and unproductive uses to productive uses and capital formation purposes through deficit financing. In democratic underdeveloped countries, deficit financing is preferred to taxation for political reasons. The government always finds it easier to print more notes and meet expenditure rather than raising the same amount through taxation measures, as there is always public resentment to additional taxes in normal times.*

## **Key Aspects of Future Commerce**

*In the future of business, “commerce” will primarily refer to a highly digital and customer-centric approach to buying and selling goods and services, heavily reliant on online platforms, data analytics, and personalized experiences, with a focus on seamless integration across various channels like social media and marketplace, essentially meaning most transaction will happen online with a strong emphasis on customer convenience and engagement. Key aspects of future commerce :-*

- E-commerce dominance:-** Online shopping will be the primary way people purchase goods, with more sophisticated platforms and features like virtual reality experience.
- Personalization :-** Businesses will use data to tailor product recommendations and marketing strategies to individual customer. **Social commerce :-** Buying and selling directly through social media platforms will become increasingly common.
- Mobile :- First approach :-** Mobile devices will be the primary access point for online commerce.
- Subscription Models :-** Recurring subscription service for products and services will be prevalent.
- AI integration :-** Artificial intelligence will be used to manage inventory, optimize pricing, and provide customer support.
- Omnichannel experience :-** seamless integration between online and offline shopping experiences will be crucial.

## **Study on Unified Payment Interface (UPI)**

*The Unified Payment Interface (UPI) is one of the great Inventions of E-Payments introduced by National Payment Corporation of India (NPCI) on April 11, 2016. The launch was in Mumbai and was performed by Dr. Raghuram G Rajan, the Governor of the Reserve Bank of India, UPI is significant payment in terms of cost ease of use for consumers, settlement times and securities. It has facilitated a large number of population to bring within the preview of digital economy. It is a type of payment system through which any customer holding a Bank account can send and receive money through a UPI-based app. Google Pay is the highest and Amazon Pay is the lowest used apps and majority use UPI apps mainly for fund transfer. UPI is faster than traditional methods like NEFT, RTGS, or IMPS. It is also made easy for the fraudsters to cheat the public by using the same sophisticated technology calling as cyber crime. Suggestion for awareness programmers should be provided to students and general public, to avoid cyber crime, by the government. From the above study, it is clear that UPI is going to change the way India is transacting now and transforming into digital payment where each person's smart phone will be the primary device for all payments.*

## **Economic Stabilization Policies**

*Economic stabilization is one of the main remedies to effectively, Control or eliminate the periodic trade cycles which plague capitalist economies or mixed economies. Economic stabilization, it should be noted, is not merely confined to a single individual sector of an economy but embraces all sectors of the economy. In order to ensure economic stability, a number of economic measures have to be devised and implemented. The following instruments are used to attain the objectives of economic stabilization, particularly control of trade cycles, relative price stability & attainment of economic growth :-*

**1. Monetary Policy :** The most commonly advocated policy of solving the problem of fluctuations is monetary policy. Monetary policy pertains to banking and credit, availability of loans to firms and households, interest rates, public debt and its management, and monetary management. However, the fundamental problem of monetary policy in relation to trade cycles is to control and regulate the volume of credit in such a way as to attain economic stability. During a depression, credit must be expanded and during an inflationary boom, its flow must be checked. Monetary management is the functions of the commercial banking system, and through it, its effects are primarily exerted on the economy as a whole.

**2. Fiscal Policy :** Today foremost among the techniques of stabilization is fiscal policy. Fiscal policy as a tool of economic stability, however has received its due importance under the influence of Keynesian economics only since the depression. The term "Fiscal policy" embraces the tax & expenditure policies of the government. Thus fiscal policy operates through the control of government expenditure and tax receipts. It encompasses two separate but related decisions: public expenditure and level and structure of taxes. The amount of public outlay, the inducement and effects of taxation and the relation between expenditure and revenue exert a significant impact upon the free enterprise economy. As a matter of fact, all government spending is an inducement to increase the aggregate demand & has an inflationary bias in the sense that it releases funds for the private economy which are then available for use in trade & business. Thus, the public expenditure and public revenue not only help to widen the economic structure of the country but also exert certain effects on the economy.

## Goods and Service Tax

जी.एस.टी. 1 जुलाई 2017 से भारत में लागू किया गया है यह भारत सरकार की अप्रत्यक्ष कर व्यवस्था है जी.एस.टी. प्रत्येक वस्तु और सेवा पर लगाया जाता है और उपभोक्ता द्वारा वस्तु खरीदने पर जी.एस.टी. दिया जाता है वर्तमान में कर संरचना को दो करो में विभाजित किया गया है

1. प्रत्यक्ष कर – यह वह कर होते हैं जिनकी देनदारी किसी और को नहीं सौंपी जा सकती है उदाहरण के लिए प्रत्येक व्यक्ति को अपनी आय पर प्रत्यक्ष कर देना पड़ता है
2. अप्रत्यक्ष कर – इन करों का भार दूसरे व्यक्ति पर सौंपा जा सकता है अर्थात् उपभोक्ता पर इसका भार पड़ता है।

जी.एस.टी. में 4 प्रकार के टैक्स हैं :-

1. *CGST & Central GST* केंद्र सरकार द्वारा एकत्र किया जाता है।
2. *SGST & State GST* राज्य सरकार द्वारा एकत्र किया जाता है।
3. *IGST & Integrated GST* राज्य और केंद्र सरकार राजस्व इकट्ठा करती है।
4. *UGST & Union territory* केंद्र शासित प्रदेशों द्वारा प्राप्त किया जाता है

### Defence Budget

The military budget or defence budget of India is the portion of the overall budget of union budget of India that is allocated for the funding of the Indian Armed Forces. The military budget finances employee salaries and training costs, maintenance of equipment and facilities. Support of new or ongoing operations, and development and procurement of new technologies Weapons, equipment, and vehicles. The Indian Army accounts for more than half of the total defence budget of India with most of the expenditure going to the maintenance of cantonments, salaries and Pensions, instead of critical arms and ammunition.

स्वायत्तमेकान्तगुणं विद्याता विनिर्मितं छादनमजतायाः ।  
विशेषतः सर्वविदां समाजे विभूषणं मौनमपण्डितानाम् ॥

व्याख्या :-

ब्रह्म ने कृपा करके मूर्खों के लिए उनकी मूर्खता को छिपाने का अत्यन्त हितकार साधन 'चुप रहना' बनाया है जो उनके ही अधीन है अर्थात् जो पूर्णतया उनके ही वश में है तथा इससे विद्वानों की सभा में उनकी शोभा भी बढ़ती है। इस प्रकार मौन रहने से मूर्खों की मूर्खता तो छिप जाती है साथ ही विद्वानों की सभा में उनका आभूषण बनकर उनकी शोभा को भी बढ़ाता है। चुप रहने से उनकी मूर्खता का भी पता नहीं चलता।

येषां न विद्या न तपो न दानं ज्ञानं न शीलं न गुणो न धर्मः ।

ते मर्त्यलोके भुवि भारभूता मनुष्यरूपेण मृगाश्चरन्ति ॥

व्याख्या :-

भृत्यहरि जी कहते हैं कि जिन मनुष्यों के पास न विद्या है न कोई तप है, न दान देने का गुण है, न ज्ञान प्राप्त करने का प्रयत्न करते हैं, जो जीवन में सदाचार का पालन नहीं करते हैं, दया दाक्षिण्यादि गुणों से रहित हैं, धर्म का आचरण भी नहीं करते ऐसे मनुष्य वास्तव में मनुष्य कहलाने के अधिकारी नहीं हैं। ऐसे मनुष्य पृथ्वी पर भार स्वरूप ही हैं तथा मनुष्य होते हुए भी पशुओं के समान इस लोक में विचरण करते हैं।

## भाव

हे विधाता! कोटि-कोटि आभार,  
ये स्वर्णिम – आभामय – स्वर्ग रूपी संसार में,  
मेरी उत्पत्ति हेतु  
आई अपार महिमा उन विधाता, प्रकृति की,  
दित्या जब जन्म जीव-जन्म आदि को,  
उन परमात्म – अंश तक।

हे भाग्यशाली परमात्मा अंश!  
बनो निर्मल नीर समान,  
आपणे सत्कर्मी द्वारा।  
तभी होगा एकीकार  
अंश का प्रकृति में।

माया रूपी संसार में ढूँढता ईश्वर पग-पग पर  
कऊन जाने, समझाए उस सुंदर अज्ञानी पतंगे को  
करे स्व-साक्षात्कार,  
पहचाने अपने भीतर समाए ईश्वर अंश को।

जे करवाएला सत्य असत्य,  
सही गलत की पहचान,  
हे अंश! क्या कित्या आभास यह तुमने?  
सेर्ह आभास है ईश्वर।

जिकराके ई पहचान करवाई,  
जाई ओ शांतिमय दीपक-लौ में,  
कर्ती प्रायश्चित आपन दुष्कर्मी के,  
कर्ती पूजन उ परमात्म-अंश के,  
कर्ती सम्मान आपन माई-बाबू जी, गुरु के,  
जिन्होंने यह आभास करवाया ।

हे ईश्वर! कोटि-कोटि धन्यवाद आपका,  
यह सुंदर जीवन मुझे देने के लिए !!!

## श्रीकृष्णः अर्जुनः संवाद

एवं प्रवर्तितं चक्रं नानुवर्तयतीह यः ।  
अधायुरिन्द्रियरामो मोघं पार्थ स जीवति ।

भावार्थ :- हे पार्थ! जो पुरुष इस लोक में अपने कर्तव्यों का पालन नहीं करता वह इंद्रियों के द्वारा भोगों में रमण करने वाला पापायु पुरुष व्यर्थ ही जाता है।

नियतं कुरु कर्म त्वं कर्म ज्योयो कर्मणः ।  
शरीर या त्रपि चते न प्रसिद्ध येदकर्मणः ॥

भावार्थ :- अपना नियत कर्म करो क्योंकि कर्म न करने की अपेक्षा कर्म करना श्रेष्ठ है। कर्म के बिना तो शरीर निर्वाह भी नहीं हो सकता।

यदाचरित श्रेष्ठः तत्तदेवेतरो जनः ।

स यत्प्रमाणं कुरुते लोकस्तदनवर्तते ॥

भावार्थ :- श्रेष्ठ पुरुष जो जो आचरण करता है। अन्य पुरुष भी वैसा ही आचरण करते हैं। वह जो कुछ प्रमाण देता है, समस्त मनुष्य समुदाय उसी के अनुसार बरतने लगता है।

### **Global Migration and Governance**

Migration entails relocating from one place to the other. The relocation takes place for a number of reasons. More specification, international migration occurs under instances where people cross state or national borders to settle in the host territory to a given duration of time (Newland 332). When this phenomenon occurs at a large scale, then it is referred to as global migration. As such, global migration can be viewed the movement of people from one country to another on a worldwide scale.

According to Newland, the number of migrants has risen sharply in the recent past.

The expansion in international movement of people is expected to grow further due to the increasing demographic disparities.

The growing number of migrants in the world highlights the importance of this and similar studies. Many immigrants are vulnerable and are exploited by addition agents for a number of reasons. In addition, they are poorly protected by international institutions and individual states.

बुधु तिन्हां रे ताणया गे परेशां होई गया  
एक दिन सै चली पेया ढंगा रे नाओं रि तलाशा पर  
पहले तिसजो इक मुर्दयात्रा मिली गयी,  
तिने पुछया कुण मरी गया  
लोके बोलया भई मरने वाले रा नाम था 'अमरचंद'  
सै आगे चलदा रेहा.....!  
आगे तिसजो एक झाड़ देंदी जनानी मिली  
तिन्हे नाम पूछया तो तिस्से बोलया 'लक्ष्मी'  
सै होर आगे गया....!  
तिसजो एक भिखारी मिल्या तिसरा नां था  
'धनपत राय'  
अब बहु जो अपणा जबाव मिली गया  
हुण कोई तिसजों नातां रा ताणा देंदा तो सै जबाव देंदा  
अमर चंद सै मरी गया  
झाड़ मारे लक्ष्मी  
धनपतराय लगिरा मांगन भीख  
मेरा नाम भाईयों बुद्ध ए ठीक !!!

## **Backend Developer**

*A backend developer is a key player in building and maintaining the server-side of web and mobile applications. unlike frontend developers, who focus on user interfaces, backend developers ensure that the systems behind the scenes operate smoothly, efficiently, and securely. their responsibilities include managing databases, creating and integrating APIs, developing server-side logic, and ensuring data security and user authentication. they work with languages like python, java, ruby, and php, and are well-versed in database management systems like mysql, postgresql, and mongodb.*

*backend developers are also responsible for handling the scalability of applications, ensuring they can handle increasing amounts of traffic and data they also work with cloud services and server management tools such as aws and google cloud, as modern applications grow more complex with real-time data, security concerns, and advanced features, the role of backend developers becomes even more critical. their expertise is essential for creating robust, secure, and efficient digital platforms that power everything from websites to mobile apps.*

*Tamanna Sharma*

*B.Sc 2nd Year-23BCS016*

## **Frontend Developer**

*Front-end developers play a crucial role in shaping the user interface (UI) and user experience (ux) of websites and applications. their job involves using HTML, CSS, and Javascript to structure, style, and add interactivity to web pages. as web technologies evolve, front-end developers must master modern tools and frameworks like react, angular, and vue.js to create dynamic, responsive, and efficient website.*

*Key Skills for front-end developers include proficiency in core web technologies, responsive web design, performance optimization, and familiarity with UI/UX principles. the role of front-end developers has expanded with the rise of full-stack development, where developers are skilled in both client-side and server-side programming. however, front-end specialists still focus on delivering high-quality interactive user experiences, challenges like cross-browser compatibility and keeping up with ever-evolving technologies remain, but the future of front-end development offers exciting opportunities. as digital experiences become more complex and immersive, the demand for skilled front-end developers will continue to grow.*

*Nishant Shukla*

*B.Sc 2 Year-23808014*

## DBMS

A database management system (DBMS) is software that enables the creation, management, and manipulation of databases. It serves as an intermediary between users and databases, allowing for efficient data storage, retrieval, and modification. DBMS are essential for managing large amounts of data in a structured and organized way, ensuring data integrity, security, and accessibility.

There are several types of DBMS, including hierarchical, network, relational, and object-oriented. The most commonly used is the relational DBMS (RDBMS), which stores data in tables and supports SQL (structured query language) for querying and managing the data. Popular examples include MySQL, PostgreSQL, and Oracle.

DBMS play a crucial role in many industries, such as banking, healthcare, and e-commerce, where large volumes of data need to be stored and accessed reliably. They also ensure that data is consistent, even in multi-user environments, by providing features like transaction management and concurrency control. As data continues to grow exponentially, the role of DBMS becomes even more critical in managing, securing, and analyzing data efficiently.

Abhishek Thakur

B.Sc 2nd Year-23BCS013

## Green Computing

Green computing is the environmentally responsible and eco-friendly use of computers and their resources. It is also known as sustainable computing. The green computing concept was started in "1992" when the US Environmental Protection Agency launched Energy Star, a program that identifies consumer electronics that meet standards in energy efficiency.

The potential for green computing to have a positive impact on the environment is considerable. The information and communication technology (ICT) sector is responsible for between 1.8% and 3.9% of global greenhouse gas emissions. Moreover, data centers account for 3% of annual total energy consumption, an increase of 100% in the last decade.

### Benefits Of Green Computing :

- Energy conservation
- Innovation and efficiency
- Reusable products.
- Reduced e-waste (Electronic Waste)
- Cost effective.

### Menus To Achieve Green Computing :

- Upgrade Data Centres
- Computer Selection
- Power down
- Power Management
- Alternative Energy
- Green computing is the need of the hour, so let us do our duty to save the mother earth from polluting by adopting the green computing.

Hrijul Sharma  
B.Sc 1st Year-24BCS015

## **Robotics and Automation**

*Robotics and Automation are revolutionizing industries, offering unprecedented efficiency, precision, and cost savings. Robotics refers to the design, construction, and operation of robots, while automation involves the use of technology to perform tasks without human intervention. Together, they are reshaping sectors such as manufacturing, healthcare, logistics and even agriculture.*

*In manufacturing, robots streamline production lines by performing repetitive tasks with high speed and accuracy. This not only boosts productivity but also reduces human error and workplace injuries. Automated systems in warehouses use robots for inventory management, sorting, and packaging, leading to faster, more efficient operations. In healthcare, robotic surgery allows for minimally invasive procedures, offering greater precision and faster recovery times. Automation in diagnostics and patient care is also improving healthcare efficiency, with AI systems helping doctors make quicker, more accurate decisions.*

*The logistics industry is benefitting from autonomous vehicles and drones, which are improving supply chain management. Self-driving trucks and drones for last-mile delivery are cutting costs and speeding up transportation. Agriculture, too, is embracing automation with robotic harvesters, drones for crop monitoring, and automated irrigation systems, contributing to more sustainable farming practices.*

*Despite concerns about job displacement, robotics and automation are creating new roles in technology development, system maintenance, and maintenance and robotics programming. As these technologies evolve, they promise to further enhance productivity and unlock new possibilities across industries, leading to smarter, more efficient solutions for global challenges.*

*Shagun Chauhan*

*B.Sc 1st Year-24BCS011*

## ***Cyber Security : Protecting the Digital World***

*Cyber security refers to the practice of defending computer systems, networks, and digital data from cyber threats such as hacking, phishing, and malware attacks. In an era where the internet is integral to daily life, the importance of safeguarding sensitive information has never been higher. With businesses, governments, and individuals increasingly relying on digital platforms, the risk of cybercrime continues to grow.*

- One of the key elements of cyber security is data protection, ensuring that personal and financial information remains secure. Attackers often use malicious software to steal or compromise data, which can lead to identity theft, financial loss, and reputational damage. As technology evolves, so do the tactics of cybercriminals, making it essential to stay ahead of emerging threats.*
- Cyber security practices include the use of strong passwords, encryption, and multi-factor authentication to prevent unauthorized access. Organizations often implement firewalls, intrusion detection systems, and regular software updates to mitigate potential vulnerabilities. Awareness and training for employees also play a crucial role in reducing the risk of cyber attacks.*
- In addition, governments worldwide have implemented regulations, such as the General Data Protection Regulation (GDPR), to hold organizations accountable for data breaches and to ensure consumer privacy.*
- Ultimately, cyber security is a collective effort that requires collaboration among individuals, businesses, and governments to ensure the digital world remains secure and trusted. It is a continuous process of improvement to stay one step ahead of evolving cyber threats*

*Pushp Sharma  
B.Sc 1st Year-24BCS007*

## ***Ethical Challenges in Synthetic Intelligence***

**1. Bias and fairness :** One of the maximum pressing ethical concerns in AI is bias. AI structures examine from datasets, and if these datasets include ancient or societal biases, the AI will inherit and doubtlessly extend them. For example, hiring algorithms trained on biased facts may additionally desire sure demographies over others, reinforcing inequality as opposed to addressing it. In addition, facial recognition technology had been criticized for being less correct in figuring out humans of certain ethnic corporations that can result in unfair results in law enforcement and safety.

*The basis of this trouble often lies in unrepresentative records or lack of diversity amongst AI builders. Addressing this requires careful curation of datasets, various illustrations in AI teams, and sturdy checking out to discover and mitigate hinses. Making sure fairness in AI isn't only a technical challenge but also a societal imperative.*

**2. Privacy and data safety :** AI structures rely heavily on statistics to characterize effectively, often neglecting sizable quantities of personal and touchy information, while this information allows AI to offer personalised offerings and make unrect predictions, it also poses significant risks to privacy. Unauthorized information series, breaches, and misuse can result in inime consequences for people and communities.

*The developing use of AI in surveillance, such as facial reputation in public spaces, raises extra concerns about the erosion of privacy and capability misuse. en Tapabilito misuse with the aid of authoritarian regimes. Hanging a stability between leveraging information for innovation and protecting character rights is a essential project inside the ethical deployment of AI.*

**3. Transparency and accountability :** The selection-making procedures of many AI structures, mainly those primarily based on deep studying, are regularly opaque. Called the "black field" trouble, this lack of transparency makes it difficult to apprehend how AI arrives at particular selections. That is specifically concerning in high-stakes situations, which include healthcare diagnoses, credit score approvals, or judicial rulings.

*Transparency is vital for building agree with in AI structures. Builders and companies should prioritize growing interpretable models and making sure that customers and stakeholders recognize how AI choices are made. Moreover, duty mechanisms have to be in region to cope with errors or unintentional effects of AI systems.*

**4. Job Displacement and monetary effect :** AI's capacity to automate responsibilities has led to fears of substantial task displacement across various industries. Whilst AI creates new possibilities and roles, it also disrupts traditional activity markets, especially in sectors like manufacturing, transportation, and customer support. This raises moral questions about the duties of governments and organizations to support employees stricken by automation.

*Investing in schooling, reskilling packages, and social protection nets can help mitigate the impact of job displacement. A forward-looking approach is important to make sure that the financial benefits of AI equitably, disbursed.*

**5. Autonomous guns and incorrect information :** The use of AI in growing independent weapons poses massive moral and safety demanding situations, those weapons, capable of making existence-and-loss of life decisions without human intervention, ought to lead to devastating outcomes if deployed irresponsibly. The worldwide network should work collectively to adjust and ban such technologies to save you misuse.

Additionally, AI has the ability to create incorrect information and manipulate public opinion. Deep fake technology, which generates sensible fake technology, which generates sensible fake videos or pics, have the capacity to unfold fake facts and undermine credibility in media and institutions. Addressing those problems calls for robust policies, public consciousness, and technological answers to discover and fight misinformation.

**Guiding concepts for ethical AI :** To cope with these challenges, a fixed of guiding standards is essential to make sure the ethical development and deployment of AI:

**1. Human-Centric layout :** AI should prioritize human properly-being, dignity, and autonomy. It ought to serve as a tool to reinforce human abilities instead of update human judgment or employer. Ethical AI development requires know-how the societal effect of era and designing structures that gain humanity as an entire.

**2. Transparency and Explainability :** Groups should make certain that AI structures are interpretable and explainable to users and stakeholders. Transparency builds accept as true with and accountability, permitting humans to recognize how AI structures paintings and the way decisions are made.

## Deep Seck

DeepSeek is a Chinese artificial intelligence company founded in 2023, dedicated to advancing artificial general intelligence (AGI). The company has gained significant attention with the release of its DeepSeek-RI-Lite- Preview model, which offers advanced reasoning capabilities comparable to OpenAI's of-preview model.

One of DeepSeek's standout features is its commitment to open-source One of DeepSeek's standout features is its development. Unlike many AI companies that keep their models proprietary. DeepSeek has made its models freely available, allowing developers and researchers to access, modify, and integrate them into various application.

The DeepSeek-RI-Lite-Preview model exemplifies this open-source approach. It introduces "chain-of-thought" reasoning, enabling the AI to tackle complex tasks, particularly in mathematics and coding, with enhanced performance. This model is accessible through DeepSeek's chat Interface, where users can interact with the AI and test its capabilities.

DeepSeek offers several features that differentiate it from ChatGPT, particularly in terms of its open-source approach and some specialized capabilities :

**1. Open-Source Model :** One of the standout differences is DeepSeek's commitment to open-source development. Unlike ChatGPT, which is proprietary and controlled by OpenAI. DeepSeek's models are freely available for developers and researchers. This open access allows for greater flexibility in experimentation, customization, and integration into various applications.

**2. Chain-of-Thought Reasoning :** DeepSeek's models, such as DeepSeek-RI-Lite- Preview, introduce advanced "chain-of-thought" collection, cleaning, processing, and interpreting and often employs techniques such as machine learning, artificial intelligence, and predictive analytics. Through these methods, data scientists uncover trends and patterns that would otherwise be impossible to detect.

The applications of data science are vast. In healthcare, it's used to predict disease outbreaks, personalize treatments, and enhance patient care. In business, it helps companies understand consumer behavior, optimize marketing strategies, and improve operational efficiency. In sports, it's used to analyze player performance and make strategic decisions. Even in education, data science aids in customizing learning experiences for students.

As industries and governments increasingly rely on date-driven decisions, the demand for skilled data scientists continues to grow. This makes data science an exciting and rewarding field for students to pursue, offering diverse career opportunities and the chance to shape the future.

In conclusion, data science is not just a technical field, it's an essential force driving innovation in today's world. As we continue to generate more data, the potential for data science in impact every aspect of our lives is limitless.

Rishabh Thakur

## **Data Science**

*In the digital age, data is considered one of the most valuable assets for businesses, governments, and individuals. Data science, the process of extracting insights and knowledge from this data, has emerged as a powerful tool for innovation and decision-making across various sectors.*

*Data science combines skills from computer science, mathematics, and statistics to analyze vast amounts of data. It involves steps like data collection, cleaning, processing, and interpreting, and often employs techniques such as machine learning, artificial intelligence, and predictive analytics. Through these methods, data scientists uncover trends and patterns that would otherwise be impossible to detect.*

*The applications of data science are vast. In healthcare, it's used to predict disease outbreaks, personalize treatments, and enhance patient care. In business, it helps companies understand consumer behavior, optimize marketing strategies, and improve operational efficiency. In sports, it's used to analyze player performance and make strategic decisions. Even in education, data science aids in customizing learning experiences for students.*

*As industries and governments increasingly rely on data-driven decisions, the demand for skilled data scientists continues to grow. This makes data science an exciting and rewarding field for students to pursue, offering diverse career opportunities and the chance to shape the future.*

*In conclusion, data science is not just a technical field; it's an essential force driving innovation in today's world. As we continue to generate more data, the potential for data science to impact every aspect of our lives is limitless.*

## **Quantum Computing**

*Quantum computing is an advanced area of computing that harnesses the principles of quantum mechanics to process information in ways that classical computers cannot. Unlike traditional computers, which use bits as the smallest unit of data (either a 0 or a 1), quantum computers use quantum bits, or qubits. Qubits can represent and store multiple values simultaneously due to a property called superposition.*

*This capability allows quantum computers to perform complex calculations at unprecedented speeds, exponentially outperforming classical computers for specific tasks. Another key feature of quantum computing is entanglement, where qubits become interconnected, allowing for faster information processing and communication.*

*Quantum computing holds promise for various applications, including cryptography, optimization problems, drug discovery, and advanced materials modeling. For instance, it could revolutionize fields such as financial modeling, where complex simulations would benefit from faster processing times.*

*Despite its potential, quantum computing is still in its infancy, with significant technical challenges to overcome, such as error rates and qubit coherence times. Research institutions and tech companies worldwide are investing heavily in quantum technologies, aiming to create practical, large-scale quantum computers.*

*As the field evolves, it could lead to transformative advancements in computing capabilities, reshaping industries and resolving problems previously deemed unsolvable. The future of quantum computing is not just a technological shift; it is a paradigm change that could redefine how we understand and interact with information.*

## Activities of Red Ribbon Club

RED RUN (MARATHON) 25/08/2023

FLASH MOB ON HIV AWARENESS (31/08/2024)

GUEST LECTURE ON HIV /AIDS AND MENTAL HEALTH AWARENESS AND SECOND HEALTH CHECK UP CAMP (07/11/2024)

STATE LEVEL MARATHON COMPETITION ON WORLD AIDS DAY(RED RUN (MARATHON)1/12/2024

WORLD AIDS DAY AWARENESS CAMPAIGNS (03/12/2024)

## ACTIVITIES OF PRAHARI CLUB

INTERNATIONAL YOUTH DAY (PLEDGE ON ANTI-DRUG ABUSE) 12/08/2024

JAM SESSION ON DRUG DEMAND REDUCTION (07/12/2024)

Poster Making and Slogan Writing on “Breaking Gender Stereotypes”

Documentary Screening on International Women Day  
Activities of Literary Club

Story Writing and Poetry Writing Workshop

Seminar on Soft Skills

Paper Presentation on Authors from Himachal Pradesh

*NCC Army Wing (Our Achievers)*

**SUO Anshul Sharma**  
HP22SDA287217  
Joined ITBP in  
Dec. 2024

**CPL Chandni**  
HP23SWA003440  
Joined Indian Navy in  
Oct 2024

**UO KomalBhawani**  
HP22SWA287224  
Best girl Senior CDT in  
ATC 206

**SGT Deepak Thakur**  
HP22SDA287214  
Attending Army Attachment  
Camp (Pathankot)

**CPL Neha**  
HP22SWA287225  
1st Position in Spoon Race  
in ATC 206

**SGT Namrata Sharma**  
HP22SWA283710  
Attending Army Attachment  
Camp (Dharmshala)

**SGT Namrata Sharma**  
HP22SWA283710  
Attending Army Attachment  
Camp (Dharmshala)

**CDT Abhishek Thakur**  
HP22SDA287215  
2nd Position in Quiz Compition,  
Attending Army Attachment  
Camp (Pathankot)

**SUO Anshul Sharma**  
HP22SDA287217  
1st position in Debate  
competition in ATC 206

**CPL Chandan Kaundal**  
HP23SDA009423  
2nd position in Guard  
Mounting in ATC 206

**LCPL Subham Kumar**  
HP23SDA009249  
2nd position in Guard Mounting  
in ATC 206 Attending Army  
Attachment Camp (Pathankot)

**LCPL Piyush Chandel**  
HP23SDA009445  
2nd Position in Guard  
Mounting in ATC 206

**CDT Deepak**  
HP23SDA009466  
2nd Position in Guard  
Mounting in ATC 206

**CDT Tarun**  
HP23SDA009448  
1st Position in Relay Race  
in ATC 206

**CDT SnehaChandel**  
HP23SWA009433  
Attending Army Attachment  
Camp (Dharmshala)

**CPL Asif Mohammad**  
HP23SDA009425  
2nd Position in Spoon Race in  
ATC 206, Attending Army  
Attachment Camp (Pathankot)

### Activities of NSS

*"Ye Diwali My Bharat Wali" Campaign*

*Community service, at Regional Hospital*

*World Book Fair 2025 at Pragati Maidan, Delhi*

*Pre RD camp at GC Bilaspur*

*Seven Day Special Camp*

*Azaadi ka Amrit Mahotsav Celebration*

### Activities of NCC Army Wing

*Independence Day Parade*

*Kargil Vijay Diwas*

## Cultural Activities

*Mime Performance during HPU Youth Festival Group IV held at Govt. College Kullu*

*Receiving Third Prize in "Mime" at HPU Youth Festival Group IV*

*"Folk Dance Team" won 1st Prize in District level completion organized by NYK*

*Dr. Namrata Pathania as delegate in International MELOW conference at Kathmandu University, Nepal (Sept. 2024)*

*Dr. Namrata Pathania awarded for "Academic Excellence" by honourable Deputy Speaker, Sh. Vinay Kumar ji, on Himachal Day 2025*

## Activities of Rovers and Rangers

*"Rangers" After completion of Nipun Camp at STC Revalsar Mandi*

*"Rangers" After completion of Nipun Camp at STC Revalsar Mandi*

*Cleanliness Drive by Rovers and Rangers Unit*

*Rally against Drug Addiction*

*Activities of Road Safety Club*

Bilaspur, Himachal Pradesh, India  
Court Rd, Koslian Sector, Bilaspur, Himachal Pradesh 174001, India

*Activity of EK Bharat Shreshth Bharat Club*

Inaugural Address by principal, Dr. P.S. Kutwal

Display of Science Models

Souvenir Release during the Conference

D. Jai Mehalwal, felicitated by the Chief Guest, former VC, Y.S.P. Parmar University, Palampur, Prof. H.C. Sharma

D. Ritu Sharma, HOD Mathematics, felicitated by the Chief Guest, former VC, Y.S.P. Parmar University, Palampur, Prof. H.C. Sharma

Expert Talk organized by Department of Physics

Scientist from ISRO, Dr. Thakur SKR, as Keynote Speaker

Dr. Thakur, SKR along with Principal, Faculty and Students of Physics Department

## Activities of NCC Naval Wing

*Cadets taking B Certificate Exam*

*Celebration of NCC Day*

*Celebration of Independence Day*

*Cadets with ANOs during NCC Day*

## Activities of NCC Army (Girls Wing)

*Enrollment Day*

*Mock Drill*

*Cadet on Traffic Duty*
