

LIBRARY AUTOMATION

The college library is equipped with the SOUL 2.0 Software since 2010 and upgraded to SOUL 3.0 in 2022, an Integrated Library Management System that automates various library functions. The software consists of several modules, including Acquisition, Cataloguing, Circulation, OPAC, Serials Control, and Administration. However, our library currently using all modules.

ADMINISTRATION MODULE:-

SOUL or any Library Management Software will work efficiently Only if parameters (Rules) for each operation are set before we start using it Live. These parameters are stored in the Set-up Pages and can be accessed by selecting "Administration". We must define rules (i.e. Information of Vendors List, Budget, Types of Resources, User Categories, Allocation of Accession Nos. etc) to configure the Software. Once these rules for various processes are fed in the LMS (Library Management Software), it will function smoothly without any obstacles. Therefore we will first set-up the requisite parameters by using options available from Administration Module.

CATALOGUING MODULE:-

The Cataloguing Module offers robust features such as maintaining an authority database of individuals, corporate bodies, subject headings, author, title, location and series names. It also assists library staff, faculty and students in efficiently processing newly acquired resources.

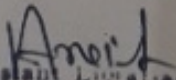

CIRCULATION MODULE:-

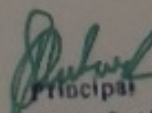

The Circulation Module allows us to create /edit/delete/search User records, renew membership and also establish relationship between the user and resources by creating transaction records (Issue/Return/Renew), Reserve the item(s), issue the items on ILL and get number of routine reports and some management reports.

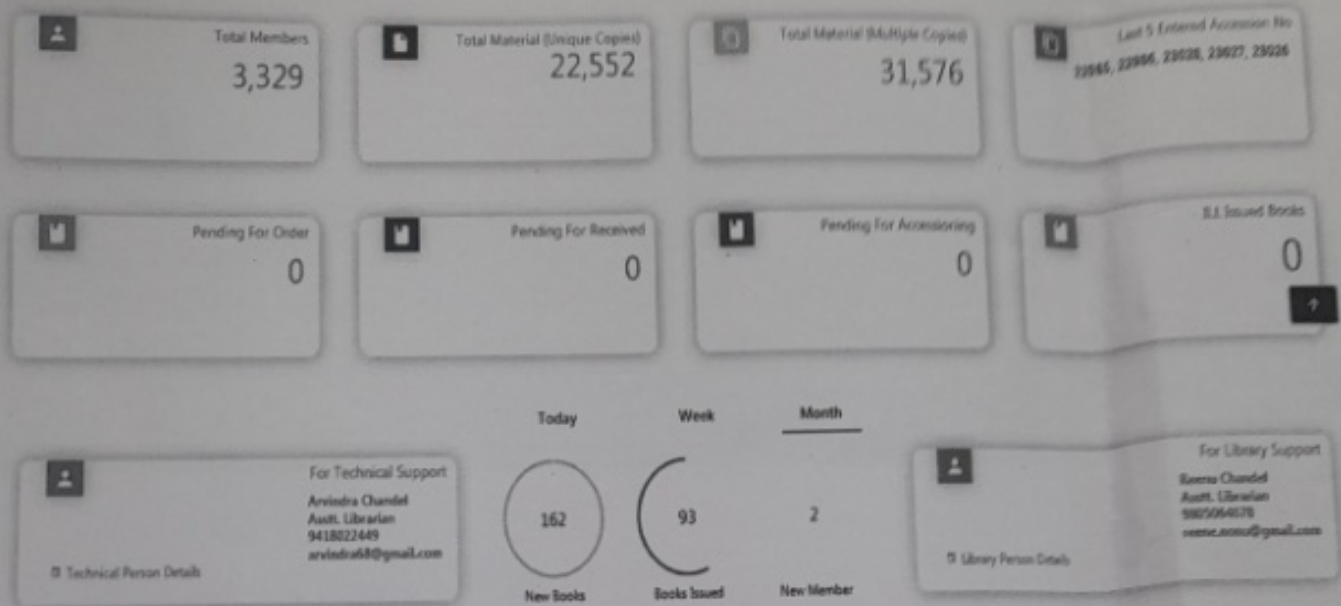

WEB OPAC:-

On the other hand, the WEB OPAC module is a major highlight of the SOUL 3.0 software. It provides users with a user-friendly interface and advanced search options, allowing them to search for library items using maximum information with location.

Both students and teachers have access to the library resources and can utilize the WEB OPAC module to search for necessary references. Although our library is fully automated, the SOUL 3.0 Software has greatly enhanced the efficiency and accessibility of our library services.
